

Press Release

Athens, May 12, 2022

Space Hellas member of the “6G Infrastructure Association”

Space Hellas, since February 2022, has been a full member of the 6G Infrastructure Association (6GIA), which is the voice of the European industry for research and innovation in next generation networks and services. The primary goal of the 6G IA is to contribute to Europe's leading position in 5G, beyond 5G and 6G.

Space Hellas is one of the 40 Industrial Partners of the “6G Infrastructure Association” and already participates in “closed” tenders under the 6G Smart Networks and Services (SNS) Joint Undertaking (participation in 6 proposals).

SNS/6G networks will be the basis for the development of a huge range of innovative implementations related to “smart” cities, health, production automation, “smart” electrical networks, autonomous vehicles, etc. 6G is expected to focus on the convergence of digital and real world, through artificial intelligence, distributed computing resources and two-way information flow.

6G-IA brings together a global telecommunications industry and digital operators, manufacturers, research institutes, universities, corporations and ICT Associations, carrying out a wide range of activities in strategic areas such as standardization, frequency range, R&D projects, technology skills, collaboration with key vertical industries, with the main goal of developing trials and successful international cooperation.

Space Hellas is constantly investing in research and development. The R&D Division of the company has to show many recognized projects at European level and significant collaborations, of high prestige.

Space Hellas S.A.
