As a Bank, and as a nation, we have turned a corner and made an emphatic pivot to growth

“2023 was a year of robust delivery for Alpha Bank as we successfully met each one of our targets. Thanks to our relentless focus on execution, we have made substantial progress against the strategic pillars laid out in our Investor Day last year and even exceeded guidance around profitability, capital and the NPE ratio.

In 2023, Net Interest Income grew significantly, as we benefitted from positive dynamics in the interest rate environment and a strong contribution from our securities portfolio. New disbursements reached a record high of €2.8 billion in Q4, leading to an annual 5% growth for our performing loan book.

We once again delivered a meaningful 200bp reduction in our NPE ratio, further normalizing asset quality, whilst our prudent approach to capital management has resulted in our CET-1 ratio rising to 15.9% when accounting for the upcoming transactions we have agreed.

The decisive actions we have taken in 2023 have accelerated and de-risked key elements of our strategic plan, with the roll out of our new service model in Retail, an expanded offering in Wealth and higher product penetration in Wholesale. Our strategic partnership with UniCredit has unlocked the profitability potential of our International business whilst creating upside potential for the rest of the Group.

While the geopolitical environment remains uncertain, the outlook for Greece is undeniably positive. The Greek economy grew at a significantly faster rate than the Eurozone average in 2023 as GDP increased by 2%, and we see this trend continuing through to 2025. The return of Greece to investment grade status last year underscored the remarkable turnaround in investor confidence in the Greek economy. We have witnessed this transformation firsthand through the landmark transaction and strategic partnership we agreed with UniCredit in October 2023, marking the first investment by a large European bank into the Greek banking system since the financial crisis.

As a Bank, and as a nation, we have turned a corner and made an emphatic pivot to growth. Over the past 12 months we have improved profitability while maintaining cost discipline, securing a stronger balance sheet and enabling healthy capital generation. We have achieved this through a resolute focus on delivering sustainable value for our shareholders, and we are proud to have enabled the proposed resumption of dividend payments from the profits accrued in this financial year.”

Business Update

The Greek economy sustained its growth premium in 2023, supported by an increase in investment, private and public consumption, employment gains and another record tourist season. The achievement of investment-grade status for the Greek sovereign confirmed the multifaceted progress made in recent years, marking an important milestone for the country and the banking sector and signaling its positive medium term prospects.

In 2023, the Bank has exceeded its guidance. An expanding top line on benign retail funding costs, growth in fees and a firm focus on cost efficiency have delivered solid earnings growth and higher levels of profitability. This has come alongside a strengthening of the balance sheet, substantial capital generation and maintenance of sector-leading capital ratios well above management targets, paving the way for the resumption of dividend distributions, subject to regulatory approval.

Our strategic initiatives, our franchise positioning and the active management of our balance sheet are expected to continue to yield improving results over the coming years. Earnings are expected to grow, with EPS exceeding €0.35 in 2026. Profitability is expected to expand to c.14%² over the next three years. Our balance sheet will strengthen further with capital buffers expanding and asset quality converging with the EU average. Our resolve and ability to deliver shareholder value has strengthened.

NII decomposition

Net F&C Income decomposition

NII performance benefitting from rates and securities contribution

Net Interest Income rose by 1% q/q to €438.7mn, benefitting from higher rates, loan volumes and an increased contribution from securities, offsetting higher ECB funding costs and higher cost of deposits. Full year NII rose by +41% y/y on similar drivers and despite incremental wholesale funding costs on the back of MREL issuance.

Robust yearly performance of fee income (+8%) on stronger cards and payments activity

Fees and commissions income stood at €99.2mn, down -1.6% q/q, on seasonally lower cards and payments activity, partly offset by business credit related fees on the back of robust loan origination in Q4. In FY 2023, recurring fees excluding Merchant acquiring were up +8.1% y/y, driven by cards and payments alongside growth in Asset Management and Bancassurance.

Income from financial operations came in at €20.6mn in Q4, mainly attributed to the increased valuation of our investment securities portfolio and gains from FX differences, with the annual contribution at €39.5mn.

Other income stood at €9.7mn in Q4 2023 and €43.2m for the year.

Recurring OPEX down 5.9% q/q

Recurring operating expenses fell 5.9% q/q to €194.5mn mainly reflecting a write back related to the Single Resolution fund (SRF) contributions alongside lower staff costs, more than offsetting a higher depreciation charge relating to intangible assets. On an annual basis, recurring OPEX was down 4.6% at €817.5mn on the back of lower general expenses. Active cost management, capacity releases from the Bank's transformation and savings from renegotiations with key suppliers, property related and NPA management costs reduction have allowed the Bank to offset increased investments in HR and IT, as well as to fund growth in its International Operations.

Total Operating Expenses at €189.1mn decreased by 8.5% q/q, with 2023 down 4.6% y/y, both due to better Recurring expenses.

Cost of Risk at 96bps

The **underlying loan impairment** charge stood at €64.5mn in the quarter, versus €49.7 in Q3 on management actions. **Servicing fees** amounted to €12.4mn, essentially flat vs. €12.9mn in Q3, with **securitization expenses** at €12.2mn vs. €10.3mn on account of an increased balance of synthetic securitizations, adding 26bps to CET1 through €800mn RWA reductions.

Excluding the impact of transactions, the **Cost of Risk** in Q4 2023 stood at 96bps over net loans vs. 75bps in the previous quarter while, including the impact of transactions, it stood at 214bps, with 118bps related to NPE transactions vs. 5bps in Q3.

On a yearly basis, CoR was relatively stable at 81bps (+5bps y/y).

The total **impact of NPA Transactions**⁴ stood at €109.1mn in the quarter, out of which €83.2mn related to Project "Gaia", a €0.5bn mortgage NPA portfolio, that has been reclassified to Held For Sale in Q4.

Other impairment losses in Q4 2023 amounted to €0.6mn.

The Group's **performing loan book** (excluding the Galaxy and Cosmos senior notes) grew by +3.4% q/q to €32.9bn (+4.8% y/y), reflecting the pickup of new loan originations in Greece from corporates and a stable pace in repayments, which has de-escalated in the second half.

Net credit expansion in Greece stood at €1.1bn in Q4 (+€0.9bn y/y), driven by a high level of disbursements in wholesale credit.

The Group's **TLTRO funding** stood at €5bn at the end of Q4, stable q/q. The Bank's blended funding cost stood at 140bps in the

quarter, up from 128bps in Q3 2023, mainly attributable to the higher cost of deposits and wholesale funding.

The Group's strong liquidity profile is evidenced by the net Loan-to-Deposit ratio of 75%, while the Group's LCR increased to 191% vs. 188% in the previous quarter, far exceeding regulatory thresholds and management targets.

In February 2024, the Bank successfully completed a €400mn senior preferred issuance, further diversifying funding sources and building-up MREL capital stack. The issuance adds to the series of successful bond issues of €3.3bn issued by the Bank over the last three years.

Asset Quality

Group NPE ratio at 6%, down 120bps q/q; Coverage increased to 45%
