# Auditor's Report (Translated from the original in Greek)

To the Shareholders of ALPHA BANK

We have audited the accompanying consolidated financial statements of ALPHA BANK (the "Bank") which comprise the consolidated balance sheet as at 31 December 2005, and the consolidated income statement, consolidated statement of changes in equity and consolidated cash flow statement for the year then ended, and a summary of significant accounting policies and other explanatory notes. These financial statements are the responsibility of the Bank's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Greek Auditing Standards, which are based on the International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, evaluating the overall financial statement presentation as well as assessing the consistency of the Board of Directors' Report with the financial statements. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the accompanying consolidated financial statements give a true and fair view, of the financial position of ALPHA BANK Group as of 31 December 2005, and of the results of its operations and its cash flows for the year then ended in accordance with International Financial Reporting Standards, that have been adopted by the European Union and the Board of Directors' Report is consistent with the accompanying financial statements.

Without qualifying our opinion we draw attention to note 38 (b) to the financial statements, that explains that the tax obligations of the Bank and its subsidiaries for certain years have not yet been audited by the tax authorities and accordingly their tax obligations for those years are not considered final. The outcome of the tax audits can not presently be determined.

Mr. Apostolides graduated from the Athens Law School. He is a member of the Bank's Board of Directors since 2004. He is member of the Diplomatic Service since 1965 and he was, among other things, Ambassador of Greece to Cyprus and Permanent Representative of Greece to the European Union in Brussels. In 1998 he was appointed General Secretary of the Ministry of Foreign Affairs and the following year was appointed Director of the National Intelligence Agency, until his retirement in November 2004.

#### **Thanos M. Veremis**

Professor of Political Sciences at the University of Athens since 1987. He is a member of the Bank's Board of Directors since 2000. He is also a member of the Board of Directors of the Hellenic Foundation for European and Foreign Policy (ELIAMEP) since 1988 and was the president of the Union from 1995 to 2000.

# SECRETARY

#### Hector P. Verykios

Senior manager, Alpha Bank

Member of the Audit Committee
Member of the Remuneration Committee

The certified auditors of the Bank are: Principal Auditors:

Substitute Auditors:

Marios T. Kyriacou Nick E. Vouniseas Garyfallia B. Spyriouni Nick Ch. Tsiboukas

of KPMG Kyriacou Certified Auditors S.A.

The Bank's shares are listed on the Athens Stock Exchange since 1925. As at 30 December2005 Alpha Bank was ranked 5th among all listed companies, in terms of market capitalization. Since February 2004 the Bank has been included in the FTSE Eurofirst 300 Index, which consists of the 300 largest European companies. Apart from the Greek market, the shares of the Bank are listed in London Stock Exchange in the form of international certificates (GDR's) and are traded over the counter in New York (ADR's). The Bank as at 31 December 2005 has issued 291,203,608 shares. The Group's growth and consistent dividend policy has attracted local and foreign investors. This has increased the shares' liquidity which for the year 2005 amounted to an average of 720,000 shares per day.

The credit rating of the Bank remains in high level (Standard & Poor's: BBB+, Moody's: A3, Fitch Ratings: A-) and reflects the dynamic of its operations and the positive share price prospect.

The Board of Directors approved the financial statements on 21 February 2006.

# Notes to the consolidated financial statements

#### 1. Accounting principles applied

#### **1.1** Basis of presentation

These financial statements relate to the fiscal year 1 January 2005 to 31 December 2005 and they are the Group's first financial statements prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union with Regulation 1606/2002 of the European Parliament and the Council of the European Union on 19 July 2002.

The financial statements are presented in Euro, rounded to the nearest thousand unless otherwise indicated.

The financial statements are prepared on the historical cost basis except for the following assets and liabilities which were measured at their fair value:

- Securities held for trading
- Derivative financial instruments
- Available-for-sale securities

The Group has prepared these financial statements in accordance with International Financial Reporting Standards. In particular the Group applied IFRS 1 "First-time Adoption of International Financial Reporting Standards", and all the standards and interpretations adopted by the European Union which are mandatory for the preparation of financial statements for periods that begin after 1 January 2005. The accounting principles applied for the preparation of financial statements as at 31 December 2005 are described below.

Set out below are the standards and interpretations that are included in the following regulations of the European Council, which were published until 31 December 2005, 1725/2003, 707/2004, 2086/2004, 2236/2004, 2237/2004, 2238/2004, 1751/2005, 211/2005, 1864/2005, 1910/2005 and 2106/2005:

- International Accounting Standards 1, 2, 7, 8, 10, 11, 12, 14, 16-21, 23, 24, 26, 27-34, 36-41.
- Interpretations of International Accounting Standards 7, 10, 12, 13, 15, 21, 25, 27, 29, 31, 32.
- International Financial Reporting Standards 1-6.
- Interpretation of International Financial Reporting Standard 1, 4 and 5.

The adoption of the above standards and interpretations is mandatory for the fiscal year and covers all the periods presented in the financial statements except for IFRS 5 which has been adopted from 1 January 2005 in accordance with the exception set out in IFRS 1.

An explanation of the impact of the transition to IFRS on the financial position and the comparative figures, previously reported in accordance with Greek generally accepted accounting principles (Greek GAAP), is included in note 48. This note provides reconciliations between Greek GAAP and IFRS of the balance sheet, equity, income statement and cash flows.

The estimates of the Bank which are applied in the decisions which are taken into account during the preparation of the financial statements are based on historical information and assumptions which at present are considered logical.

The estimates and assumptions are re-assessed to take into account current conditions and the effect of any changes are recognized in the financial statements in the period that they occur.

#### **1.2 Basis of consolidation**

The consolidated financial statements include the parent company Alpha Bank, its subsidiaries, associates and joint ventures.

a. Subsidiaries

Subsidiaries are entities controlled, directly or indirectly, by the Bank. The financial statements of subsidiaries are included in the consolidated financial statements from that date that control commences until the date that control ceases.

The purchase method of accounting is used to account for the acquisition of subsidiaries by the Group. When the cost of acquisition exceeds the fair value of the Group's share of the identifiable net assets acquired the excess is recorded as goodwill, which is tested for impairment annually. If the cost of acquisition is less than the fair value of the identifiable net assets of the subsidiary acquired, the difference is recognized directly in the income statement.

Special purpose entities are consolidated in the group's financial statements when the substance of the relationship between the Bank and the entity indicates that the entity is controlled by the Bank.

Inter company transactions are eliminated unless the transaction provides evidence of impairment of the asset transferred and it is recognized in the consolidated balance sheet.

Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

b. Associates

Associates are entities over which the Group has significant influence but not control, generally accompanying a shareholding, directly or indirectly, of between 20% and 50% of the voting rights.

Investments in associates are accounted for by the equity method of accounting.

The Group's share of the associates post-acquisition profits or losses is recognized in the income statement.

Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group.

c. Joint ventures

According to IAS 31, joint ventures are those entities over whose activities, the Group has joint control, established by contractual agreement whereby two or more parties undertake an economic activity.

The consolidated financial statements include the Group's share of the joint venture under the proportionate consolidation method.

Details of the entities and the Group's ownership interest of subsidiaries and joint ventures is provided in note 39, and for associates in note 18.

#### **1.3 Segment reporting**

The Group after taking into account the present management and reporting structure, and that the majority of its income arises from activities in Greece decided that: a. the primary reporting format are the following business segments:

- Retail
- Corporate
- Asset Management and Insurance

- Investment Banking and Treasury
- South Eastern Europe
- Other

b. the geographical segments are the secondary reporting format:

GreeceOther Countries

Detailed information relating to business and geographical segments are presented in note 40.

#### **1.4** Foreign currency transactions

The consolidated financial statements are presented in Euro, which is the currency of the country of incorporation of the Bank (functional currency). Items included in the financial statements of each of the Group's companies are measured using the currency of the country of incorporation or the currency of the primary economic environment in which the company operates or the currency used for the majority of transactions held.

Transactions in foreign currencies are translated to Euro at the closing exchange rates at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated to Euro at the closing exchange rate at that date. Foreign exchange differences arising on translation are recognized in the income statement.

Non-monetary assets and liabilities are recognized at the exchange rate ruling at initial recognition, except for those non-monetary items denominated in foreign currencies that are stated at fair value. The exchange differences relating to these items are part of the change in fair value and they are recognized in the income statement or recorded directly in shareholders' equity depending on the classification of the non-monetary item.

The results and financial position of all the group entities that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (a) Assets and liabilities for each balance sheet presented are translated to Euro at the closing rate at the date of that balance sheet.
   The comparative figures presented are translated to Euro at the closing rates at the respective dates of the comparative balance sheet.
- (b) Income and expenses for each income statement are translated to Euro at average exchange rates applicable for each period presented.

The resulting exchange differences from the above translation and those arising from other monetary items designated as a part of the net investment in the entity are recorded in equity. When a foreign subsidiary is sold, such exchange differences are recognized in the income statement as part of the gain or loss on sale.

#### **1.5** Cash and cash equivalents

For the purposes of the consolidated cash flow statement, cash and cash equivalents consists of:

- a. Cash on hand.
- b. Non-restricted placements with Central banks.
- c. Short-term balances due from banks.

Short-term balances due from banks are amounts that mature within three months after the date of the consolidated financial statements.

#### 1.6 Classification and measurement of financial assets

The Group classifies its financial assets in the following categories:

- Loans and receivables.
- Held-to-maturity investments.
- Financial assets at fair value through profit or loss.
- Available-for-sale financial assets.

For each of the above classifications the following is applicable:

a) Loans and receivables

Included in this category are:

- i. Direct loans to customers
- ii. Amounts paid for a portion or total acquisition of bonds issued by customers
- iii. All receivables from customers, Banks etc.

Loans and receivables are carried at amortized cost.

b) Held-to-maturity

Held–to-maturity investments are financial assets that the Group has the positive intention and ability to hold to maturity.

This category is carried at amortized cost. The Group has not included any financial assets in this category.

c) Financial assets at fair value through profit or loss.

Financial assets included in this category are those:

- i. That are acquired principally for the purpose of selling in the short term and in order to exploit short term market fluctuations (trading portfolio). The Group has included in this category fixed rate Government bonds, except from particular issues that other decision has been taken, treasury bills and a limited number of shares.
- ii. The Group, at initial recognition, carries this category at fair value and recognize changes in fair value in the income statement. The Group has not included items in this category.

d) Available for sale

Available for sale financial assets are investments that have not been classified in any of the previous categories.

The Group has included in this category:

- i. Variable interest rate bonds
- ii. Some issues of Greek State fixed rate bonds, which are decided to be classified in available for sale category and fixed rate bonds of other issues.
- iii. Shares
- iv. Mutual fund units.

This category is carried at fair value. Changes in fair value are recognized directly in equity until the financial asset is derecognized or impaired at which time the cumulative gain or loss previously recognized in equity is transferred in profit or loss.

The measurement principles noted above are not applicable when a particular financial asset is a hedged item, in which case the principles set out in note 1.7 are followed.

#### **1.7** Derivative financial instruments and hedge accounting

Derivatives are financial instruments that upon inception have a small or zero value and subsequently change in accordance with a particular underlying instrument (foreign exchange, interest rates, index or other variable).

All derivatives are recognized as assets when their fair value is positive and as liabilities when their fair value is negative.

Derivatives are entered into for either hedging or trading purposes and they are measured at fair value irrespective of the purpose for which they have been entered into.

The Group's activities involve the use of derivatives as a means of exercising assetliability management within the guidelines established by the Asset-Liability Committee (ALCO).

When the Group uses derivatives for hedging purposes it ensures that appropriate documentation exists on inception of the transaction, and that the effectiveness of the hedge is monitored on an ongoing basis and the above are repeated at each balance sheet date.

In addition the Group uses derivatives for trading purposes to exploit short-term market fluctuations, within the Group risk level set by the Asset-Liability Committee (ALCO). Valuation differences arising from these derivatives are recognized in gains less losses on financial transactions

We emphasize the following:

a. Synthetic Swaps

The parent company (ALPHA BANK), in order to increase the return on deposits to selected customers uses synthetic swaps. This involves the conversion of a Euro deposit to JPY with a simultaneous forward purchase of JPY to cover the foreign exchange exposure.

The result arising from the forward foreign exchange is recognized as interest expense, foreign exchange differences and other gains less losses on financial transactions.

#### b. FX Swaps

These types of Swaps are entered into primarily to hedge the exposures arising from customer loans and deposits. As there is no documentation to support hedge accounting they are accounted for as trading instruments. The result arising from these derivatives is recognized as interest expense, foreign exchange differences, in order to match with the interest element resulting from the deposits and loans, and other gains less losses on financial transactions.

#### Hedge accounting

Hedge accounting relates to the valuation rules to offset the effects on the gain or loss from changes in the fair value of a hedging instrument and a hedged item which would not be achieved if the normal re measurement principles were followed.

Documentation of the hedge relationship upon inception and of the effectiveness of the hedge on a on-going basis are the basic requirements for the adoption of hedge accounting.

The hedge relationship is documented upon inception and the hedge effectiveness test is carried out upon inception and it is repeated each reporting date.

#### Fair value hedge

A fair value hedge of a financial instrument offsets the change in the fair value of the hedged item in respect of the risks being hedged.

Changes in the fair value of both the hedging instrument and the hedged item in respect of the risk being hedged are recognized in the income statement.

The Group uses interest rate swaps (IRS's) to hedge risks relating to borrowings, bonds, loans and fixed rate term deposits.

#### Cash flow hedge

A cash flow hedge changes the cash flows of a financial instrument from a variable rate to a fixed rate.

The effective part of any gain or loss on the hedging instrument is recognized directly in equity, whereas the ineffective part is recognized in the income statement. The accounting treatment of the hedged item does not change.

There were no instances that would require cash flow hedge accounting.

Hedges of net investment in a foreign operation

It is applied to hedge the foreign exchange risk, arising from investments in foreign operations.

#### 1.8 Property, plant and equipment

This caption includes: land, buildings (owned and leased) for use by the branches or for administrative purposes, additions and improvements of leased fixed assets and equipment. Property, plant and equipment are stated at cost less accumulated depreciation. The historical cost includes costs relating to the acquisition of property and equipment.

Subsequent expenditure is capitalized or recognized as a separate asset only when it increases the future economic benefits. Expenditure on repairs and maintenance is recognized in the income statement as an expense as incurred.

Depreciation is charged on a straight line basis over the estimated useful lives of property, plant and equipment taking into account residual values.

The estimated useful lives are as follows:

- Buildings:
- Additions to leased fixed assets and improvements:

20 to 33 years. duration of the lease. 4 to 20 years.

- Equipment and vehicles:

Land is not depreciated, however, it is reviewed periodically for impairment. The residual value of property and equipment and their useful lives are periodically reviewed and adjusted if necessary at each reporting date.

Property and equipment which is considered impaired is carried at its recoverable amount. Gains and losses from the sale of property and equipment are recognized in the income statement.

#### **1.9 Investment property**

The Group includes in this category buildings or a portion of buildings together with the respective portion of the land that is held to earn rental income.

Investment property is initially recognized at cost, which includes all related acquisition costs. Subsequent to initial recognition investment property is stated at cost less accumulated depreciation and impairment losses.

All costs for repairs and maintenance are recognized in the income statement as incurred.

The estimated useful lives over which depreciation is charged are the same as own-used property.

#### **1.10** Goodwill and other intangible assets

- Goodwill

Goodwill represents the difference between the cost of an acquisition over the fair value of the Group's share of the net identifiable assets of the acquired entity at the date of acquisition.

Goodwill arising from acquisitions after 1/1/2004 is recorded to "Goodwill and other intangible assets". Goodwill on acquisitions of associates is included in "Investment in associates".

At the end of each year recognized goodwill is tested for impairment.

Negative goodwill is recognized in the income statement.

- Other intangible assets

The Group has included in this caption:

- a) Intangible assets (deposit base, relationships with customers and brand name) which were recognized from the acquisition of the Serbian Bank Jubanka a.d. Beograd according to IFRS 3. These intangible assets are carried at cost less accumulated amortization. The amortization is charged over the estimated useful life of each type of asset and it is defined as follows:
  - For deposit base and customer relationships to 6 years
  - For brand name to 2 years
- b) Software is carried at cost less amortization. Amortization is charged over the estimated useful life, which the Group has defined from three to four years. Expenditure incurred to maintain the software programs is recognized in the income statement.

For intangible assets no residual value is estimated.

#### 1.11 Leases

The Group enters into leases either as a lessee or as a lessor.

When the risks and rewards incident to ownership of an asset are transferred to the lessee they are classified as finance leases. All other lease agreements are classified as operating leases.

The accounting treatment followed depends on the classification of the lease, which is as follows:

- a) When the Group is the lessor
  - i. Finance leases:

For finance leases where the Group is the lessor the aggregate amount of lease payments is recognized as loans and advances.

The difference between the present value (net investment) of lease payments, and the aggregate amount of lease payments, is recognized as unearned finance income and is deducted from loans and advances.

The lease rentals received decrease the aggregate amount of lease payments and finance income is recognized on an accrual basis.

The finance lease loans are subject to the same impairment testing as applied to customer loans and advances as described in note 1.13.

ii. Operating leases:

When the Group is a lessor of assets under operating leases, the leased asset is recognized and depreciation is charged over its estimated useful life. Income arising from the leased asset is recognized as other income on an accrual basis.

- b) When the Group is the lessee
  - i. Finance leases:

For finance leases, where the Group is the lessee, the leased asset is recognized as own-used property, plant and equipment and a respective liability is recognized in other liabilities. At the commencement of the lease the leased asset and liability are recognized at amounts equal to the fair value of leased property or, if lower, the present value of the minimum lease payments.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease or if this is not available the Group's borrowing rate for similar financing.

Subsequent to initial recognition the leased assets are depreciated over their useful lives unless the duration of the lease is less than the useful life and the Group is not expected to obtain ownership by the end of the lease, in which case the asset is depreciated over the term of the lease.

The lease payments are apportioned between the finance charge and the reduction of the outstanding liability.

ii. Operating leases:

For operating leases, the Group as a lessee does not recognize the leased asset but charges in general administrative expenses, the lease payments on an accrual basis.

#### **1.12 Insurance activities**

#### a. Insurance reserves

The insurance reserves are the current estimates of future cash flows arising from insurance life and non-life contracts.

The reserves consist of:

i. Mathematical reserves

The insurance reserves for the term life contracts (e.g. term, comprehension, investment) are calculated on actuarial principles using the present value of future liabilities less the present value of premiums to be received. The calculations are based on technical assumptions (mortality tables, interest rates) in accordance with the respective supervisory authorities on the date the contract was signed.

If the carrying amount of the insurance reserves is inadequate, the entire deficiency is provided for.

ii. Unearned premiums reserves

Represent part of net premiums earned which cover proportionally the period from the balance sheet date to the termination of the period the net premium covers.

iii. Outstanding claims reserves

Concern liabilities on claims occurred and reported but not yet paid at the balance sheet date. These claims are determined on a case-by-case basis based on existing information (loss adjustors' reports, doctors reports, court decisions etc) at the balance sheet date. Provisions are also determined for claims incurred but not reported at the balance sheet date (IBNR), the calculation of these provisions is based on the estimated average cost of claim.

iv. Reserves for investments held on behalf and at risk of life insurance policy holders

These reserves are accounted for as assets and liabilities at the current value of the associated investments.

b. Revenue recognition

Revenues from life and non-life insurance contracts are recognized when they become payable.

c. Reinsurance

The reinsurance premiums ceded and the respective ceded portion of the insurance reserves follow the terms of the relevant reinsurance agreements.

d. Distinction of insurance products

In accordance with IFRS 4 contracts that do not transfer significant insurance risk are characterized as investment and/or service contracts, and their accounting treatment is covered by IAS 32 and IAS 39 for financial instruments and IAS 18 for revenue.

Based on the above the following were separated from insurance services:

- a) The individual unit linked contracts with zero insured capital.
- b) Group pension fund contracts under unit-linked management.
- c) Group contract services provided for which the Company acts as intermediate (motor assistance and accident care).

#### e. Liability adequacy test

In accordance with IFRS 4 an insurer shall assess at each reporting date whether its recognized insurance reserves are adequate (less deferred acquisition costs and related intangible assets) to cover the risk arising from the insurance contracts. If that assessment shows that the carrying amount of its insurance reserves is inadequate the entire deficiency is recognized in profit or loss.

The methodology applied for life insurance was based on current estimates of all future cash flows, from insurance contracts and of related handling costs. These estimates were based on assumptions representing current market conditions and regarding mortality, cancellations, future changes and allocation of administrative expenses, medical inflation relating to medical changes and the discount rate. The guaranteed return included in certain insurance contracts has also been taken into account in estimating cash flows.

For the liability adequacy test of claims reserves, the triangulation method (chainladder/link ratio) was used which is based on the assumption that the proportional relation occurred in past years between the amounts of cumulative claims (paid and outstanding) will be repeated in the future. Data of the last five years were used for the calculation of the relevant test.

#### 1.13 Impairment losses on loans and advances

The Group has assessed as at 31.12.2003, and at each balance sheet date, whether there is evidence of impairment in accordance with the general principles and methodology set out in IAS 39 and the relevant implementation guidance.

Specifically the steps performed were the following:

a. Establishment of events that provide objective evidence that a loan is impaired (trigger events).

The loans and advances with payment of interest or principal overdue by more than 90 days represents the majority of the loans which were tested for impairment.

In addition an impairment test may be performed for accounts with delays less than 90 days, or accounts with no delay when:

- i. procedures for forced recovery have initiated
- ii. the Group has information that indicates that the financial position of the borrower is deteriorating (reduced sales, gross margins, profit etc.) or other events (bankruptcy filing, extra-ordinary events such as floods, fire, etc at the installations of the borrower) which occurred after the date of initial recognition and which are considered to affect the ability of the borrower to adhere to the agreed repayment schedule.

Finally, an impairment test is performed on loans and advances granted to sectors of the economy or geographical regions which are experiencing problems that arose after the date of initial recognition of the loans.

b. The criteria for assessment on an individual or collective basis.

The outstanding balance is the basic factor in determining whether the assessment of impairment will be performed on an individual basis or on a collective basis.

In determining the amount for each entity of the Group numerous factors were considered such as the composition of the loan portfolio the specific circumstances of the market and experience obtained from the management of the portfolio.

More specifically for the Group's parent company Alpha Bank the separation point is the amount of  $\in$  1 million.

c. Establishment of groups of assets with similar risk characteristics

In those instances which based on the amount outstanding the assessment of impairment was performed on a collective basis of assets with similar risk characteristics, with respect to credit risk, the collective groups were determined as follows:

i. the borrowers' industry (construction, tourism etc.) for commercial loans.

II. the type of loan (consumer, credit cards, mortgage etc.) for retail loans.

Based on detailed internal data the above groups are either expanded or combined in the event that this is justified from the historical data.

d. Methodology in determining future cash flows from impaired loans

The Group has accumulated a significant amount of historical data of the last five years, which includes the loss given default for loans after the completion of forced recovery, or other measures, of loans, including the realization of all collaterals held.

On the basis of this data the amount of the impairment is determined on both an individual and collective basis taking into account the time value of money.

The cash flows are discounted at the loans' original effective interest rate.

e. Interest income recognition

Interest income on impaired loans is recognized based on the carrying value of the loan after the impairment at the original effective interest rate.

f. Impairment recognition

The Group write-offs impaired loans, with exceptions to a small number of accounts with large outstandings were an allowance account is established.

g. Recoveries

If in a subsequent period events occur after the impairment which result in a decrease in the impairment or the collection of amounts from loans and advances previously written-off, the recoveries are recognized in the income statement.

#### 1.14 Deferred taxation

Deferred taxation is the tax that will be paid or for which relief will be obtained in the future resulting from the different period that certain items are recognized for financial reporting and tax purposes.

Deferred tax is provided for temporary differences arising between the tax base of assets and liabilities and their carrying amounts in the financial statements.

Deferred tax assets and liabilities are provided based on the expected manner of realization or settlement using tax rates (and laws) enacted at the balance sheet date.

A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the asset can be utilized, taking into consideration the enacted tax rates at balance sheet date.

Current and deferred tax is recognized in the income statement except to the extent that it relates to items recognized directly to equity in which case it is recognized in equity.

#### 1.15 Non-current assets held for sale

Consists of property and machinery that the Group obtained from foreclosures, which are held for sale.

Certain items of property are at present leased to third parties, but these lease agreements were entered into before the Group obtained possession of the property.

Assets held for sale are valued at the lower between the carrying amount and the fair value less cost to sell.

Property in this category are not depreciated, however, they are reviewed for impairment at each reporting date.

Gains or losses from the sale of these assets are recognized in the income statement.

#### **1.16 Financial liabilities**

Financial liabilities may be classified as held for trading:

- i. when the financial liability is acquired or repurchased in the short term to take advantage of short-term market fluctuations.
- ii. they are derivatives which are not used for hedging purposes.

Financial liabilities are initially recognized and re measured at fair value, with changes in fair value recognized in the income statement.

The Group has included in this category derivatives which are not used for hedging purposes.

The liabilities from derivatives which are used for hedging purposes are measured at fair value. Changes in fair value are accounted for as set out in note 1.7.

The liabilities which are not classified in the above category are measured at amortized cost using the effective interest method. Liabilities to credit institutions and customers, debt issued and other loan liabilities are classified in this category.

#### **1.17 Employee benefits**

The Group has both defined benefit and defined contribution plans. A defined benefit plan is a pension plan that defines an amount of pension benefit that an employee will receive on retirement which is dependent, among others, on years of service and salary on date of retirement and it is guaranteed by the Bank.

A defined contribution plan is where the Group pays fixed contributions into a separate entity. The Group has no legal or constructive obligation to pay further contributions if the fund does not have sufficient assets to pay all employees the benefits relating to employee service in current or prior years.

The liability recognized in the consolidated balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets together with adjustments for unrecognized actuarial gains or losses and past service costs.

The defined benefit obligation is calculated annually based on actuarial valuation performed by independent actuaries using the projected unit credit method.

The present value of the defined benefit is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability.

Cumulative actuarial gains and losses arising from experience adjustments and changes, and actuarial assumption variations to the extent that they exceed 10 per cent of the greater of the accrued obligations and the fair value of plan assets are amortized in a period equal to the average remaining working lives of the employees. Past-service costs are recognized immediately in income, unless the changes to the pension plan are conditional on the employees remaining in service for a specified period of time (the vesting period). In the second case, the past service costs are amortized on a straight line basis over the vesting period.

For defined contribution plans, the Group pays contributions to publicly or privately administered pension insurance plans, to insurance companies and other funds on a mandatory or voluntary basis. The Group has no further payment obligations once the contributions have been paid. The contributions are recognized as employee benefit expense on an accrual basis. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in the future payments is available.

#### 1.18 Share options granted to employees

The Group rewards the performance of its executives and managers by granting share options. The share options are exercised after the expiration of three years from the grant date.

The fair value calculated at grant date, is recognized over the period from the grant date and exercise date and recorded as an expense in payroll and related costs with an increase of a reserve in equity respectively. The amount paid by the beneficiaries of share options upon the exercise date increases the share capital of the Group.

#### **1.19 Provisions**

A provision is recognized when the Group has a constructive or legal obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation and the amount has been reliably estimated. Provisions are measured by discounting the expected future cash flows at a rate that reflects current market assessments of the time value of money. Cash payments are recorded to provisions to the extent that they relate to the specific provision. At each reporting period provisions are re-assessed.

Provisions are not recognized for future operating losses. However, future events that may affect the amount required to settle the obligation, for which a provision has been recognized, are taken into account when sufficient objective evidence exists that they will occur. Reimbursements from third parties relating to a portion of or all of the estimated cash outflow are recognized as assets, only when it is virtually certain that they will be received. The expense recognized in the income statement relating to the provision may be presented net of the amount of the reimbursement.

#### 1.20 Sale and repurchase agreements

The Group enters into purchases of securities under agreements to resell at a certain date in the future at a fixed price. Securities purchased subject to commitments to resell them at future dates are not recognized.

The amounts paid are recognized in loans and advances to either banks or customers. The difference between the purchase price and the resale price is recognized as interest on an accrual basis.

Securities that are sold under agreements to repurchase continue to be recognized in the consolidated balance sheet and are measured in accordance with accounting policy of the category that they have been classified and are presented as investments. The proceeds from the sale of the securities are reported as liabilities to either banks or customers. The difference between the sales price and the repurchase price is recognized on an accrual basis as interest.

Securities borrowed under securities borrowing agreements are not recognized except when they have been sold to third parties whereby the gain on the sale is recognized in the income statement and the liability to deliver the security is recognized at fair value.

#### 1.21 Equity

#### Incremental costs of share capital increase

Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

#### Share premium

The issuance of shares as consideration for the acquisition of a business are shown at their market value. The difference between the nominal value of the shares issued and their market value is recorded as share premium.

#### Employee share options

The fair value of share options granted to the Group's management is recorded to equity and to the income statement, respectively. Upon the exercising of the share options the amount received from the beneficiaries is recorded as share capital.

#### Treasury shares

The cost of acquiring treasury shares is recognized as a reduction of equity. Subsequent gains or losses from the sale of treasury shares, after deducting all direct costs and taxes, is recognized directly in retained earnings.

#### Retained earnings

When the Group's ownership interest in a subsidiary increases as a result of an acquisition, the difference between the consideration paid and the share of net assets acquired is recognized directly to retained earnings.

Sales of ownership interests in subsidiaries that do not result in a loss of control for the Group, is considered as a transaction between related Group equity parties and the gain or loss arising from the sale is recognized directly to retained earnings.

Dividends are deducted from retained earnings and recorded as a liability in the period that the dividend is approved by the General Meeting of the shareholders.

#### 1.22 Interest income and expense

Interest income and expense are recognized in the income statement for all instruments measured at amortized cost.

The recognition of interest income and expense is performed on the accrual basis using the effective interest rate method.

The effective interest rate method is a method of calculating the amortized cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or the next repricing date, in order the present value of the future cash flows to be equal to the carrying amount of the financial instrument including fees or transaction costs.

Interest on financial assets that are impaired is determined on the balance after the impairment provision using the effective interest rate.

Interest income and expense is also calculated for interest bearing financial instruments that are measured at fair value.

#### 1.23 Fee and commission income

Fee and commission income are recognized on a accrual basis when the relevant service has been provided.

Transaction revenues relating to the recognition of a financial instrument which measured at amortized cost, such as loans and advances, are capitalized and recognized in the income statement using the effective interest method.

#### 1.24 Comparatives

To the extent considered necessary the comparatives have been adjusted to facilitate changes in presentation of the current year amounts.

#### Note:

Based on Art. 141 of L. 2190/1920 leasing transactions are accounted for in accordance with International Financial Reporting Standards and are not adjusted for income tax purposes.

#### **11. Earnings per share**

Basic earnings per share:

Basic earnings per share is calculated by dividing the profit after tax for the period attributable to the equity holders of the Bank by the weighted average number of ordinary shares outstanding, after deducting treasury shares held, during the period.

	From 1 January to	
	31.12.2005	31.12.2004
Profit attributable to shareholders of the Bank (in € thousands)	502,174	408,228
Weighted average number of outstanding ordinary shares	285,768,514	283,218,650
Basic earnings per share (in € per share)	1.76	1.44

#### Diluted earnings per share:

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares. The Bank has a single category of dilutive potential ordinary shares resulting from a share options program. For the share options, a calculation is performed to determine the number of shares that could have been acquired at fair value (determined as the average annual market share price of the Bank's shares) based on the monetary value of the subscription rights attached to outstanding share options. The weighted average number of shares calculated as above is compared with the number of shares that would have been issued assuming the exercise of the share options.

	From 1 January to	
	31.12.2005	31.12.2004
Profit attributable to shareholders of the Bank (in $\in$ thousands)	502,174	408,228
Weighted average number of outstanding ordinary shares	285,768,514	283,218,650
Adjustment for share options	402,740	416,166
Weighted average number of outstanding ordinary shares for diluted earnings per share Diluted earnings per share	286,171,254	283,634,816

The bank is required to maintain current account to country's Central Bank (Bank of Greece) in order to facilitate interbank transactions with a Central Bank and other financial institutions through the Trans European – Automated Real Time Gross Settlement Express Transfer System (Target).

Bank of Greece requires also that all financial institutions established in Greece, to maintain deposits with the Central Bank equal to 2% of total customer deposits.

These deposits bare interest at the refinancing rate as set by the European Central Bank (31.12.2005: 2.25%).

# 27. Debt securities in issue and other borrowed funds

The Group to effectively fund its activities has significantly broaden its funding sources and so as to ensure:

- i) cheaper funding
- ii) long-term funding
- iii) strengthening of the capital adequacy ratio

As a result the Group has issued:

- i) Senior debt securities
- Subordinated debt securities
   These securities are subordinated, because the holders in case of a compulsory payment are satisfied after the owners of common debt securities. Their maturity is 10 years, with the right of first redemption after 5 years. These bonds are considered own funds for regulatory purposes.

# **37. Hybrid securities**

Alpha Group Jersey a wholly owned subsidiary of the Bank issued hybrid securities (Noncumulative guaranteed Non-voting preferred securities) as follows:

- On 5 December 2002 amount of € 200 million preferred securities with interest step up clause, which represent Lower Tier 1 capital for the Group.
   They are perpetual securities and may be redeemed after the expiration of 10 years.
   Preferred securities give the issuer the right of no preferred dividend payment if the Bank does not pay any dividend to common shareholders. They carry interest at the 3-month Euribor plus a margin of 265b.p. If redemption option is not exercised by the issuer the margin is increased by 132.5b.p. reaching 397.5b.p in total. The preferred securities are listed on the Luxembourg Stock Exchange.
- On 5 December 2003 amount of € 100 million preferred securities with the same characteristics as those issued on 5 December 2002.

 On 18 February 2005 amount of € 600 million preferred Securities without an interest step up clause, which also represent Lower Tier 1 capital for the Group since they fulfill the requirements of securities with interest step up clause as described above. The expenses of the issue mentioned above is amounted to €12 million. Non-cumulative dividend of preferred securities carry fixed interest at 6% for the first 5 years and thereafter interest is determined based on the formula 4x(CMS10-CMS2) with a ceiling and floor rate of 10% and 3.25% respectively. CMS10 and CMS2 represent the Euribor of interest rate swaps of 10 and 2 years, respectively.

# **Additional Information**

# 38. Contingent liabilities and commitments

a) Legal issues

The Bank in the ordinary course of business is a dependent in claims from customers and other legal actions. No provision has been recorded because after calculation with legal council, the ultimate disposition of these matters is not expected to have a material effect on the financial position or operations of the Bank.

There are no pending legal cases or issues in progress which may have a material impact on the financial statements of the other companies of the Group.

b) Tax issues

d)

e)

The Bank's books and records have been audited by the tax authorities up to the year 2002 and for the other companies of the group up to the year 2000. Additional tax and penalties may be imposed for the unaudited years.

c) Operating leases

The Group's minimum future lease payments are as follows:

Less than one year         25,396         24,552           Between one and five years         73,101         78,422           More than five years         46,567         60,381           Total         145,064         163,355           The minimum future lease revenues are as follows:         31.12.2005         31.12.2004           Less than one year         4,149         2,679           Between one and five years         15,613         13,295           More than five years         12,864         12,885           Total         32,626         28,859           P Off balance sheet llabilibles         31.12.2004         145,014           Letters of credit         234,470         97,077           Letters of guarantee         3,749,766         3,656,395           Approved loan agreements and credit limits         12,232,183         10,516,615           Total         16,216,419         14,270,087           P Assets pledged         31.12.2004         5,000           Securities linked to reverse repos         420,000         5,000           Trading securities         -         80,000           Investment securities         165,000         100,000           Total         585,000         185,000		31.12.2005	31.12.2004

# 41. Financial risk management

### 41.1 Market risk

Market risk is the risk of losses arising from unfavourable developments in interest rates, exchange rates, equity prices and commodities. Losses may also occur from trading portfolio and the management of assets and liabilities.

The market risk is measured by the Value at Risk – VAR. The method applied for calculating Value at Risk is historical simulation. The Bank applies a holding period of 1 and 10 days, depending on the time required to liquidate the portfolio.

For the fiscal year of 2005 it applied a 99% confidence level and a two year observation period.

During the fiscal year of 2005 the average Value at Risk for the Bank's trading portfolio for a ten day holding period was  $\in$  18,2 million. The maximum and minimum values were  $\in$  51,7 million (18.11.2005) and  $\in$  3 million (23.6.2005) respectively.

For 31 December 2004 the respective items are as follows:

- Average Value at Risk for 10 days, € 17.9 million.
- Maximum and minimum values € 54.9 million (3.2.2004) and € 3 million (7.12.2004).
- Value at Risk for 10 days in total for the Bank including investments € 13.1 million.

Positions held by the Group are minimal.

The Value at Risk methodology is complemented with stress tests based on both historical and hypothetical extreme movements of market parameters, in order to estimate the potential size of losses that could arise in extreme conditions.

Within the scope of policy-making for financial risk management by the Assets and Liabilities Management Committee (ALCO), exposure limits and maximum loss (stop loss) for various products of the trading portfolio have been set. In particular the following limits have been set for the following risks:

- Foreign currency risk for spot and forward positions.
- Interest rate risk for positions on bonds, Interest Rate Swaps, Interest Futures, Interest Options.
- Price risk for position in shares, index futures and options.
- Credit risk for interbank transactions, corporate bonds and Government bonds of emerging markets.

Positions held in these products are monitored during the day and are examined as to the corresponding limit percentage cover and limit excess.

#### Analysis of Assets and Liabilities

Market risk may also arise, apart from the trading portfolio, from the analysis of assets and liabilities loan portfolio and deposits.

The method applied for calculating interest rate and foreign exchange risk is the same for the Bank and companies of the Group.

The Group takes on exposures to effects of fluctuations in foreign currency exchange rates. The management of the Bank sets limits on the level of exposure by currency and in total for both overnight and intra-day positions. The total position arises from the net on balance sheet position and derivatives forward position.

GAP Analysis allows an immediate calculation of changes in net interest income and the value of assets and liabilities upon application of alternative scenarios, such as changes in market interest rates or changes in the Bank's and Group's base interest rates.

# 41.2 Credit risk

Credit risk is the risk that a counterparty (borrower) will be unable to pay amount in full when due. Impairment provisions are provided for losses that have been incurred at the balance sheet date.

Moreover, significant changes in the economy, or state of a particular industry could result in risks that are different from those provided for at the balance sheet date. To manage these risks management has established limits in relation to individual borrowers or groups of borrowers.

The limits established are constantly monitored and are subject to a regular review by the responsible (based on the amount of the limit) approval body. Limits relating to specific credit products, industries and countries are examined and approved by the ALCO and Executive Committee.

The exposure to credit risk is managed by an analysis of the ability of the borrowers to their obligations using internal credit rating systems and methodologies.

In the instances of borrowers who have obtained facilities from other Group companies, the total exposure on a Group basis is taken into account in determining the credit risk. In addition Group companies use procedures and credit rating systems adopted to their products.

As a result the credit limits are adjusted if considered necessary. In addition the above analysis takes into account the interest rate spread and collaterals held.

# 41.3 Liquidity risk

Liquidity risk relates to the Group's ability to maintain sufficient funds to cover its obligations. To that end, a liquidity GAP analysis is performed.

Cash flows arising from all assets and liabilities are estimated and classified into relevant time periods, depending on when they occur. The liquidity Gap analysis is set to the table below:

Liquidity risk (liquidity	(Thousands of Euro) more than

A substantial portion of the Group's assets is funded with customer deposits and bonds issued by the Group. This type of funding can be divided into two categories:

a) Customer deposits for working capital purposes

Deposits for working capital purposes consist of savings accounts and sight deposits. Although these deposits may be withdrawn on demand number of accounts and type of depositors helps to ensure against unexpected fluctuations. So, such deposits constitute mostly a stable deposit base. Principles of economic analysis (GARCH) are applied in order to estimate the maximum daily outflows at a confidence level of 99%. For example, the maximum daily savings accounts outflow was estimated to 1% of the total balance and on the sight deposits accounts the respective outflow was 6.3% of the total balance.

 b) Customer deposits and bonds issued for investment purposes Customer deposits and bonds issued for investment purposes concern customer time deposits, customer repurchase agreements (repos) and sale of bonds issued by the Group. In order to

measure the risk of these types of deposits daily outflows are estimated with statistical analysis of the daily renewal rate of such deposits.

### 42. Capital adequacy

The ratios measure capital adequacy by comparing the Group's regulatory own funds with the risks that it undertakes (risk weighted assets). Own funds include Tier I capital (share capital, reserves, minority interest), additional Tier I capital (hybrid debt) and Tier II capital (subordinated debt and fixed asset revaluation reserves). The risk-weighted assets arise from the credit risk of the investment portfolio and the market risk of the trading portfolio.

The Group uses all modern methods to manage capital adequacy. It has issued hybrid and subordinated debts which are included on the calculation of regulatory funds. The cost of these debts is lower than share capital and adds value to the shareholders.

The current capital ratios (Tier I ratio and capital adequacy ratio) are much higher than the regulatory limits set by the Bank of Greece directive (4% and 8%, respectively) and the capital base is capable to support the business growth of the Group in all areas for the next years.

	(Millions of Euro)		
	31.12.2005	31.12.2004	
Risk-weighted assets from credit risk	25,586	23,416	
Risk-weighted assets from market risk	812	718

Upper Tier I capital	2,211	1,960	
Tier I capital	2,947	2,227	
Total Tier I + Tier II capital	3,820	2,964	
Upper Tier I ratio	7.8%	8.1%	
Tier I ratio	10.4%	9.2%	
Capital adequacy ratio (Tier I + Tier II)	13.5%	12.3%	

### 43. Related-party transactions

a. The outstanding balances with members of the Board of Directors are as follows:

	31.12.2005	31.12.2004
Loans	5,628	3,804
Deposits	14,854	20,140
Letters of guarantee	145	10

b. The outstanding balances with associates and the related results of these transactions are as follows:

Associates		
0	31.12.2005	31.12.2004
Assets Loans and advances to customers	1,390	1,862
Total	1,390	1,862
Liabilities		
Amounts due to customers	639	181,083
Other liabilities	-	123
Total	639	181,206
Letters of guarantee	1,353	216,561
Total	1,353	216,561

	31.12.2005	31.12.2004
Income	110	770
Interest and similar income	113	770
General administrative revenue	23	204
Total	136	974
Expenses Interest and similar charges General administrative expenses Total	6 1,184 1,190	821 16,098 16,919

c. The Group companies Board of Directors fees for the fiscal year 2005 amount to € 5,458 (31.12.2004: € 4,169). The increase attributed to the fact that modifications have been made in Bank's Board of Directors as at 23 February 2005.

#### 44. Share options granted to employees

a) On 11 April 2000 the Shareholders' in general meeting approved a share option plan to be granted to the executive managers of the Bank and Group, which would be granted based on their performance. The total number of shares to be issued under the share option plan was set at 0.5% of the total shares in issue and the exercise price was set at the nominal value. If subsequent to the grant date, there is a change in either the nominal value of the shares or the number of shares in issue, the number of issued options is adjusted so that their fair value is not altered.

The exercise of the share options is three years after the grant date, and the Bank is not obliged to settle the options in cash.

The movement of the outstanding share options and their weighted average exercise price, after the adjustment following the share capital increase of 30 March 2004 and 19 April 2005 with the approval of the annual ordinary General Assemblies is as follows:

	2005		2004	
	Average exercise	Share options	Average exercise	Share options
	price per share	remaining	price per share	remaining
1 January	5.00	557,431	5.00	447,924
Granted	-	-	5.00	284,540
Cancelled	5.00	(18,857)	5.27	(16,399)
Exercised	-	-	5.42	(102,445)
Adjusted	5.00	(15,352)	5.00	(56,189)
31 December	5.00	523,222	5.00	557,431

The number of the outstanding share options at 31 December 2005 resulted in 523,222 (31 December 2004 : 557,431) with the remaining average weighted duration of 17 months (31 December 2004 : 29 months) and exercise price  $\in$  5 (31 December 2004 :  $\in$  5).

The average weighted fair value per option, determined using the Black & Scholes valuation model. The significant inputs into the model are the share price, exercise price, dividend yield, discount rate and volatility. Volatility, that is the standard deviation of expected share price variations is measured based on statistical analysis of daily share prices over the last 12 months.

b) On 24 May 2005 the shareholders' in general meeting approved a share options plan to be granted to the executive managers of the Bank and the Group. The duration of this plan is 5 years maturing in December 2009. The total number of shares to be issued under the share plan was set up to 1% of the total shares in issue and the exercise price will range from the nominal value up to 80% of the market price of the share.

### 45. Business combinations

#### a) Acquisition of Jubanka a.d. Beogard

On 3 February 2005 Alpha Bank acquired 88.64% of the share capital of Jubanka a.d. Beograd ("Jubanka") a bank established in Serbia. The acquisition of Jubanka will enhance the Bank's presence in Serbia and strengthen its operations with an additional 90 branches, 286,000 retail and 30,000 business customers. Serbia is a key market for the Bank in terms of growth prospects in the retail, corporate and public sectors.

The acquired company's profit contribution for the period from 3 February 2005 to 31 December 2005 was  $\in$  11,5 million.

The book value of Jubanka a.d. Beograd at the date of acquisition is presented in the "Book Value" column of the following table.

The allocation of the cost of acquisition , in accordance with IFRS 3, was completed at 30 September 2005 and, resulted in the recognition of intangible assets of  $\in$  19.2 million and of liabilities of  $\in$  1.9 million which are presented in "Fair Value" column of the following table. These intangible assets concern Jubanka's deposit base, relationships with customers, brand name and software royalties. The annual depreciation charge of these intangible assets depend on the nature and the estimated useful life of each type of asset. The depreciation charge for the period from 3 February 2005 to 31 December 2005 was  $\in$  3,3 million.

	(Millions of Euro)

acquisition:	2,8	
Total cost of acquisition:	154,8	
Goodwill	57,4	
000dwill	57,4	

The Bank in accordance with the provisions of the relevant purchase agreement made an offer on 11 July 2005 for the purchase of the remaining shares of Jubanka (minority shares). In August 2005 the Bank successfully completed the purchase of the minority shares of Jubanka. As a result, the Bank's participation in Jubanka amounts to 99.999% of the total share capital.

The total cost of shares purchase, including the minority shares, amounts to  $\in$  174.3 million.

### b) Merger by absorption of Delta Singular A.E. by Alpha Bank

\_

In June 2004 Alpha Bank announced the merger by absorption of Delta Singular A.E., a company listed on the Athens Stock Exchange, which Alpha Bank had an ownership interest of 38.76%. The legal procedure of the merger became effective on 8 April 2005, when the relevant decision of the Greek Ministry of Development was published in the Government Gazette. The absorbing entity (Alpha Bank) issued 7,564,106 new shares in exchange for the remaining 61.24% of the share capital of Delta Singular A.E.

The share exchange ratio was certified as to its fairness, by independent auditors based on financial data deriving from the balance sheets of the merged entities which were prepared on 31 July 2004 (reporting date). The above data were included on the merger agreement plan in August 2004 by the decisions of the Board of Directors of merged entities.

In accordance with the Greek corporate Law, after the completion of the merger the absorbed company ceases to exist as a legal entity and all its assets and liabilities become assets and liabilities of the absorbing entity (principal of Universal succession). Up to 8 April 2005 Delta Singular A.E. was included in the consolidated financial statements of Alpha Bank as an associate and was accounted under the equity method. The Group's share of loss of associates for the period 1.1.2005-8.4.2005 was charged with  $\in 1$  million.

Delta Singular A.E. had undergone a significant corporate reorganization throughout 2004, by disposing its main business units, i.e. outsourcing services, software development and systems integration, to international and Greek investors. As a result, as at 8 April 2005 date of legal completion merger, its net assets ( $\in$  256.1 million) were the following:

	(Millions of Euro)		
	Fair Value		
Assets			
Cash	178,3		
Fixed Assets	55,1		
Available for sale securities	8,2		
Investments in subsidiaries and associates	0,6		
Other assets	14,6		
Total Assets	256,8		
Liabilities	0,7		
Equity	256,1		
Total Liabilities and Equity	256,8		
Delta Singular A.E. net assets acquired by Alpha Bank			
(€ 256.1 million x 61.24%):	€ 156.8 million		
Cost of acquisition for 61.24% (value of 7,564,106	new issued		
shares of Alpha Bank with price € 19.72 per share) Negative goodwill:	): € 149.1 million. € 7.7 million		

(Millions of Fure)

The above negative goodwill increased the results for the period 1.1.2005-31.12.2005 and is included in other income.

*c)* During the year, the Bank acquired 60.10% of the share capital of APE Commercial Property A.E. and APE Fixed Assets A.E. The cost of the acquisition for both companies amounted to  $\in$  72.2 thousand.

*d)* On 21.11.2005 Alpha Insurance A.E., a group entity, sold the shares it held of its subsidiary Alpha Insurance Brokers A.E. which amounted to 95% of the share capital of the company for  $\in$  2,45 million. Until 21.11.2005 Alpha Insurance Brokers A.E. was consolidated as a subsidiary of Alpha Bank with an ownership interest of 94.58%. The profit after tax of Alpha Insurance Brokers A.E. for the period from 1.1.2005 to 21.11.2005, which have been included in the consolidated 2005 income statement amounts to  $\in$  0,27 million. The equity of the company amounts to  $\in$  0,37 million.

From the sale of the shares of the company a loss of  $\in$  0,20 million or the difference between the sales proceeds and the net assets plus goodwill. In addition sales tax of  $\in$  0,12 million was paid.

- *e)* On 29 November 2005 the merger by absorption of Alpha Finance Ltd (Cyprus) by Alpha Bank Ltd (Cyprus) was completed. Up to that date Alpha Finance Ltd (Cyprus), as a wholly owned subsidiary of the Bank, was consolidated.
- *f*) On 30 August 2005 the Board of Directors of Alpha Ventures and Alpha Equity Fund decided to start the process of merging the two companies, by absorption of the second by the first, with a balance sheet date of 31 August 2005. Both companies wholly owned subsidiaries by the Bank. The merger is expected to be completed during 2006.
- *g)* On 30 December 2005 the Board of Directors of Alpha Mutual Funds AEDAK and Alpha Asset Management decided to start the process merging the two companies, by absorption of the second the first, with a balance sheet date of 31 December 2005. Both companies are wholly owned subsidiaries by the Bank. The merger is expected to be completed during 2006.
- *h)* During the fiscal years 2004 and 2005, except for the matter discussed in paragraph in d) above regarding the legal transfer of shares, the Group did not sell directly or indirectly its participation in any principal subsidiary or associate.

#### 46. Events after the balance sheet date

- a) On 16 February 2006 was completed the legal transfer to third parties, from the Bank and its subsidiaries, of the sale of Alpha Insurance Romania S.A. shares. The agreed sale price amounts to € 2,7 million. For the above transfer an agreement has been signed as at 11 October 2005 (note 24).
- b) According to Board of Directors meeting held on 17 February 2006 of subsidiary Ionian Hotel Enterprises A.E. decided to explore the possibility of selling the Rhodes Hilton Hotel owned by the company.

#### 47. Restatement of prior periods financial statements

In comparison with the published financial statements as at 30.9.2005, the following income statement captions were restated as follows:

	1.1-31.12.2004	1.1-30.9.2004	1.1-30.6.2004
Income statement			
Other income	(9.335)	(5,195)	(1,762)
Staff costs	(3.225)	(2,543)	(1,762)
General administrative expenses	(6.110)	(2,652)	-

The above restatements had not modified the fiscal's year 2004 result.

#### 48. Effects on the consolidated financial statements from transition to IFRS

In accordance with the European Union Directive 1606/2002 and Codified Law 2190/1920 the adoption of International Financial Reporting Standards (IFRS) is applicable for financial statements that relate to periods after 1.1.2005.

Due to the requirement to present 2004 comparatives on a consistent basis, the transition date to IFRS is 1.1.2004. On this date the transition balance sheet is prepared in accordance with IFRS 1.

Specifically, IFRS 1 requires the retrospective application of the new accounting standards, except for the exemptions discussed below, which are either mandatory exemptions or exemptions that the Group has the option to apply.

Mandatory exemptions from full retrospective application of IFRS

a. De recognition of financial instruments

Financial instruments derecognized before 1 January 2004 are not re-recognized under IFRS, even in the event that the financial instruments derecognized do not meet the de recognition criteria of IAS 39.

The Group did not choose to apply the de recognition criteria to an earlier date before 1.1.2004 according to IFRS 1.

b. Hedge Accounting

The requirements relating to hedge accounting have been considered for transactions arising after 1.1.2004. Transactions outstanding as at 1.1.2004 were examined as to adherence to hedge accounting criteria during the preparation of the IFRS transition balance sheet date and thereafter.

c. Estimates

An entity's estimates at the date of transition to IFRS, and comparative period (year 2004) should be consistent with estimates made for the same date under Greek GAAP, unless there is objective evidence that these estimates were in error.

There is no evidence to suggest that a revision of the estimates used by the Group in preparing the comparatives and the IFRS transition balance sheet is necessary.

d. Non-current assets held for sale and discontinued operations

IFRS 5, which address the measurement and presentation of non-current assets held for sale, was applied from 1.1.2005 in accordance with the transition provisions of the Standard.

In the periods covered by these financial statements the Group does not have operations that will be discontinued.

Optional exemptions from full retrospective application of IFRS

#### a. Business combinations

The Group elected not to restate business combinations that occurred prior to the 1.1.2004 transition date to IFRS, retaining the accounting treatment followed under Greek GAAP.

The consolidation differences and goodwill resulting from the above transactions which were recorded as at 31.12.2003 directly to equity were transferred to retained earnings.

b. Fair value used as deemed cost

In Group's financial statements as at 31.12.2003 prepared in accordance with Greek GAAP land and buildings were valued to fair value based on the requirements of Law 3229/2004. The fair value of the above assets, has been used as deemed cost at the date of transition to IFRS and the depreciation is charged over their useful lives. The revaluation surplus that had been recorded directly to a reserve in equity under Greek GAAP has been transferred to retained earnings.

c. Employee benefits

The employee defined benefit obligations recognized as at 1.1.2004 include the cumulative actuarial losses, which would not have been recognized if the Group had applied IAS 19 retrospectively.

Subsequent actuarial gains or losses to the extent that they exceed either 10% of the accrued obligation or the fair value of plan assets will be amortized in a period equal to the average remaining working lives of the employees.

d. Compound financial instruments

Compound financial instruments issued by an entity which contain both a liability and equity component should be classified separately on initial recognition.

Exemption from the retrospective application of the above accounting treatment applies when the instruments do not exist at the transition date.

This exemption is not applicable for the Group.

e. Adoption of IFRS 4, IAS 32 and 39 and classification of financial instruments

The Group did not use the exemption given by IFRS 1 concerning the comparative financial information for financial instruments and insurance contracts and adopted IAS 32, 39 and IFRS 4 from 1.1.2004.

The classification of financial instruments as available-for-sale securities and financial assets held for trading was performed at 1.1.2004.

f. Share-based payment transactions

The Group has elected to apply the share-based payment exemption, and applied IFRS 2 from 1.1.2004 to share options granted after 7.11.2002 but that have not vested by 1.1.2005.

g. Foreign exchange differences arising from the translation of foreign currency financial statements

The Group adheres to the IFRS principle relating to the translation difference arising from the consolidation of financial statements prepared in a foreign currency from 1.1.2004.

h. Financial statements of subsidiaries and associates

Subsidiaries and associates that have adopted IFRS prior to 1.1.2005 are included in the consolidated financial statements with no further adjustments, except for adjustments relating to the consolidation.

The financial statements of the remaining subsidiaries and associates are adjusted to conform with IFRS to be included in the consolidated financial statements.

Furthermore, the Group decided to adopt IFRS from 1.1.2005 for subsidiaries that were preparing their financial statements according to their local accounting standards.

#### 48.3 Consolidated cash flow statement as at 31.12.2004

	Greek GAAP	Adjustments	IFRS
Cash flow from operating activities	(4.248.406)	3.274.077	(974.329)
Cash flow from investing activities	(158.983)	(251.849)	(410.832)
Cash flow from financing activities	3.624.325	(3.701.939)	(77.614)
Effect of exchange rate fluctuations on cash and cash			
equivalents		4.890	4.890
Net increase (decrease) in cash and cash equivalents Cash and cash equivalents at the beginning of the	(783.064)	(674.821)	(1.457.885)
period	7.367.471	(341.202)	7.026.269
Cash and cash equivalents at the end of the period	6.584.407	(1.016.023)	5.568.384

The major adjustments are due to:

a) the definition of cash and cash equivalents.

According to IFRS, cash and cash equivalents include cash on hand, non-restricted placements with Central Banks and short-term balances due from banks maturing within three months after the date of the financial statements. According to Greek GAAP, cash and cash equivalents include cash and balances with Central Banks and all short-term balances due from banks. Additionally, cash and cash equivalents, reported under IFRS, include the recognition of balances relating to subsidiaries that were not consolidated under Greek GAAP.

b) the net increase or decrease in cash and cash equivalents of subsidiaries that were not consolidated under Greek GAAP.

c) reclassifications.
