The attached notes (pages 9 to 33) form an integral part of these interim financial statements.

## Notes to the interim financial statements

## Accounting principles applied

#### 1. Basis of presentation

The Bank has prepared the condensed interim financial statements as at 30.9.2006 in accordance with International Accounting Standard (IAS) 34, "Interim Financial Reporting".

The accounting policies applied by the Bank in these condensed interim financial statements as at 30 September 2006 are the same as those applied by the Bank in its published financial statements for the year ended 31 December 2005, taking into consideration the new standards, amendments and interpretations issued by the International Accounting Standards Board (IASB) and adopted by the European Union, which are effective for accounting periods beginning on or after 1.1.2006:

#### 1.1 IAS 19 (amendment), «Employee Benefits» (Rule 1910/8.11.2005)

The amendment of IAS 19 introduces the option of an alternative recognition approach for actuarial gains and losses of some benefit plans.

It allows the total recognition of actuarial gains and losses directly in equity. It also clarifies the way the companies must include defined benefit obligations to their financial statements and it imposes the disclosure of additional information.

The Bank has not changed the accounting policies relating to the recognition of defined benefit obligations.

#### 1.2 Amendment IAS 39, Fair Value option (Rule 1864/15.11.2005)

According to the above amendment, under certain circumstances, the Bank has the ability to designate financial instruments upon initial recognition, to be measured at fair value, with changes in fair value recognized in profit and loss (fair value option). The Bank did not use the above option at the present financial statements.

# 1.3 <u>IAS 39 (amendment), Recognition and Valuation of financial instruments (Rule 2106/21.12.2005)</u>

According to this amendment, it permits the entities to designate, under certain circumstances, forecast intragroup transactions denominated in foreign currency, as the hedged instrument in the Group's financial statements.

As at 30.9.2006, no forecast intragroup transactions had occurred which could be recognized as hedged instruments.

## 1.4 IAS 39 and IFRS 4 (amendment), Financial Guarantee Contracts (Rule 108/27.1.2006)

The main objective of these amendments is to ensure that the issuers of financial guarantee contracts include the obligations on their balance sheet. Particularly, the issuer of such contract must initially recognize it at its fair value (except it is considered as an insurance contract) and subsequently to measure it at the higher of:

(i) the amount arising from the principles of IAS 37 relating to provisions.

and

(ii) the amount initially recognized, reduced by the amount that has been already recognized as revenue, according to IAS 18, for revenue recognition.

This amendment did not have a significant effect on the Bank's financial statements.

# 1.5 <u>Amendment in IAS 21, concerning the effects of exchange prices variation (Rule 708/8.5.2006)</u>

This amendment allows the direct recognition of the foreign exchange differences in equity. These exchange differences result from monetary assets, which consist part of the net investment in foreign currency, even if these monetary assets are presented in different currency from the functional currency of the counterparties of the Group.

On 30.9.2006 no monetary assets consisting part of a net investment in foreign currency existed.

Interpretation 4 <u>« Determining whether an Arrangement contains a Lease»</u>,

Interpretation 5 «Rights to Interests arising from Decommissioning, Restoration and

Environmental Rehabilitation Funds» (Rule 1910/8.11.2005).

Interpretation 6 <u>«Liabilities arising from participating in a Specific Market – Waste</u>

Electrical and Electronic Equipment» (Rule 108/27.1.2006)

Interpretation 8 and 9 <u>«Scope of IFRS 2» and «Reassessment of embedded derivatives»</u> (Rule 1329/8.9.2006)

The adoption of interpretations 4, 5, 6, 8 and 9 resulted in no substantial effect on the Bank's financial statements.

Apart from the amendments of the Standards and the new interpretations stated above, the European Union, on 27.1.2006, adopted, through rule 108/2006, the International Financial Reporting Standard 7 « Financial instruments: Disclosures», as well as the changes that it has imposed to other Standards.

IFRS 7 and the amendments that it imposes on other standards are effective for accounting periods beginning on or after 1.1.2007 and they are expected to affect significantly the disclosure requirements concerning financial instruments.

In addition from 8.5.2006, through 708/2006 regulation, interpretation 7, « Applying the restatement Approach under IAS 29 Financial Reporting in Hyperinflationary Economies» was adopted, which is not expected to have a substantial effect on the financial statements of the Bank.

Finally, IASB has issued interpretation 10 which is effective for annual periods beginning after 1.11.2006 and it has not been adopted, yet, by the European Union. Its application will not have a significant impact on the financial statements of the Bank.

The financial statements are presented in Euro, rounded to the nearest thousand unless otherwise indicated.

The financial statements are prepared on the historical cost basis except for the following assets and liabilities, which were measured at fair value:

- Securities held for trading
- Derivative financial instruments
- Available for sale securities

The adoption by the European Union, by 31 December 2006, of new standards, interpretations or amendments issued by the International Accounting Standards Board (IASB) and their mandatory or voluntary adoption after 1 January 2006, may retrospectively affect the period that these interim financial statements cover.

#### 10. Income tax

In accordance with Greek tax law the profits of entities in Greece are taxed at a rate of 32% for 2005, 29% for 2006 and 25% for 2007 and thereafter.

In addition, in accordance with article 9 of Law 2992/2002, the tax rate for entities that have concluded mergers is reduced by 10% and 5%. This reduced rate is applicable on the profits declared for the first and second fiscal year after the completion of the merger respectively, on the condition that the entities were not related from 1.1.1997 up to 20.3.2002. For entities that were related up to 31.12.1996 the reduction of the tax rate amounts to 5% for each year.

Based on the above, the 2005 profit of the Bank was taxed at the rate of 22% and the 2006 profit will be taxed with 24% due to the merger with Delta Singular A.E.P., a listed company, which was not related with the Bank before 1.1.1997.

It should be noted that, due to the fact that all profits have been taxed, the distribution of dividends to shareholders are free of tax.

Income tax

Income tax is analyzed as follows:

	From 1 Ja	nuary to	From 1 July to		
	30.9.2006	30.9.2005	30.9.2006	30.9.2005

Deferred tax	20,226 9,6		9,333	4,318	
Total	104,032	58,356	36,055	24,207	

The difference of income tax in the comparative periods is due to the increased profit for the period 1.1-30.9.2006, the decrease of non taxable income (dividends) and the change of tax rate as mentioned above.

Deferred tax recognized in the income statement is attributable to the following temporary differences:

## 11. Earnings per share

Basic earnings per share:

Basic earnings per share is calculated by dividing the profit after tax for the period by the weighted average number of ordinary shares outstanding, after deducting the weighted average number of treasury shares held, during the period.

	From 1 Ja	anuary to	From 1:	July to
	30.9.2006	30.9.2005	30.9.2006	30.9.2005

Basic earnings per share				
(in € per share)	0.9 <del>4</del>	0.70	0.31	0.22

Diluted earnings per share:

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares. The Bank has a single category of dilutive potential ordinary shares resulting from a share options program.

For the share options, a calculation is performed to determine the number of shares that could have been acquired at fair value (determined as the average annual market share price of the Bank's shares) based on the monetary value of the subscription rights attached to outstanding share options.

The weighted average number of shares calculated as above is compared with the number of shares that would have been issued assuming the exercise of the share options.

## 21. Debt securities in issue and other borrowed funds

The Bank, to effectively fund its activities has significantly broadened its funding sources so as to ensure:

- i) cheaper funding
- ii) long-term funding
- iii) strengthening of the capital adequacy ratio

As a result the Bank has issued:

- i) Senior debt securities
- ii) Subordinated debt securities

These securities are subordinated, because the holders in case of a compulsory payment are satisfied after the owners of common debt securities.

Their initial maturity is 10 years, with the right of first redemption after 5 years. These bonds are considered own funds for regulatory purposes.

iii) Hybrid securities with or without interest step-up clause.

These securities are referred to as hybrid securities because they combine characteristics of debt and equity. They are perpetual securities and are offered for long-term borrowing. They can be redeemed after the expiration of 10 years.

In addition a wide range of insurance products are also offered to individuals and corporations.

## iv. Investment Banking / Treasury

Includes stock exchange, advisory and brokerage services relating to capital markets, and also investment banking facilities, offered by the Bank. This segment also includes the interbank Dealing Room (FX Swaps, Bonds, Futures, IRS, Interbank placements – Borrowings etc.).

#### v. South Eastern Europe

Consists of the Bank's branches operating in South Eastern Europe.

#### vi. Other

This segment consists of the administration of the Bank.

#### 25. Capital adequacy

The ratios measure capital adequacy by comparing the Bank's eligible capital with the risks that the Bank undertakes (risk weighted assets). Own funds include Tier I capital (share capital, reserves), additional Tier I capital and Tier II capital (subordinated debt and fixed asset revaluation reserves). The risk-weighted assets arise from the credit risk of the banking book and the market risk of the trading book.

The Bank uses all modern methods to manage its capital adequacy. It has issued hybrid and subordinated debt which are included in the calculation of eligible capital. The cost of these types of debt is lower than share capital and adds value to the shareholders.

The current capital ratios (Tier I ratio and capital adequacy ratio) are much higher than the regulatory limits set by the Bank of Greece directive (4% and 8%, respectively) and the capital base is capable to support the business growth of the Bank in all areas for the next years.
