1. Notes to the financial statements

1.1 General Information

These financial statements include the interim financial statements of the parent company FRIGOGLASS S.A.I.C. (the "Company") and the consolidated annual financial statements of the Company and its subsidiaries (the "Group"). The names of the subsidiaries are presented in Note 15 of the financial statements.

Frigoglass S.A.I.C. and its subsidiaries are engaged in the manufacturing, trade and distribution of commercial refrigeration units and packaging materials for the beverage industry. The Group has manufacturing plants and sales offices in Europe, Asia, and Africa.

The Company is a limited liability company incorporated and based in Kifissia, Attica. The Company's' shares are listed on the Athens Stock Exchange.

The address of its registered office is:

15, A. Metaxa Street GR 145 64, Kifissia Athens, Hellas

The company's web page is: www.frigoglass.com

2. Summary of significant accounting policies

The principal accounting policies adopted in the preparation of these interim financial statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated.

2.1 Basis of Preparation

These financial statements have been prepared by management in accordance with International Financial Reporting Standards (IFRS), and more specifically in accordance with IAS 34 Interim Financial Reporting and IFRIC interpretations as adopted by the European Union, and International Financial Reporting Standards issued by the IASB.

All International Financial Reporting Standards issued by the IASB and effective at the time of preparing these financial statements have been adopted by the European Commission through the endorsement procedure established by the European Commission, with the exception of International Accounting Standard 39 "Financial Instruments: Recognition and Measurement". Following recommendations from the Accounting Regulatory Committee, the Commission adopted Regulations 2086/2004 and 1864/2005 requiring the use of IAS 39, minus certain provisions on portfolio hedging of core deposits, by all listed companies from 1 January 2005.

Since the Group and the Company are not affected by the provisions regarding portfolio hedging that are not required by the EU-endorsed version of IAS 39, the accompanying

financial statements comply with both IFRS as adopted by the EU and IFRS issued by the IASB.

The financial statements have been prepared under the historical cost convention.

The preparation of financial statements in accordance with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise judgement in the process of applying the accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 4.

2.2 Consolidation

2.2.1 Subsidiaries

Subsidiaries are all entities (including special purpose entities) over which the Group has the power to govern their financial and operating policies, generally accompanying a shareholding of more than 50% of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases. The purchase method of accounting is used to account for the acquisition of subsidiaries. The cost of an acquisition is measured as the fair values of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus any costs directly attributable to the acquisition. The acquired identifiable assets, liabilities and contingent liabilities are measured initially at their fair values at the acquisition date, irrespective of the extent of any minority interests (minority rights).

The excess of the cost of acquisition over the Group's share of the fair value of the net assets of the subsidiary acquired is recorded as goodwill. Note 2.6.1 describes the accounting treatment of goodwill.

Whenever the cost of the acquisition is less than the fair value of the Group's share of the net assets of the subsidiary acquired, the difference is recognised directly in the income statement.

Inter-company transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless there is evidence of impairment.

Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

The Company accounts for investments in subsidiaries in its separate financial statements at historic cost less impairment losses.

2.3 Segment reporting

A business segment is a group of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other business segments. A geographical segment is engaged in providing products or a service within a particular economic environment that are subject to risks and returns that are different from those of segments operating in other economic environments.

2.4 Foreign currency translation

2.4.1 Functional and presentation currency

Items included in the financial statements of each entity in the Group are measured using the currency that best reflects the economic substance of the underlying events and circumstances relevant to that entity ("the functional currency").

The consolidated financial statements are presented in Euros, which is the Company's functional and presentation currency.

2.4.2 Transactions and balances

Foreign currency transactions are translated into the functional currency using exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions, and from the translation at year-end exchange rates, of monetary assets and liabilities denominated in foreign currencies, are recognised in the income statement.

2.4.3 Group companies

The results and financial position of all group entities that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- Assets and liabilities for each balance sheet presented are translated at the closing rate at the balance sheet date.
- Income and expenses for each income statement are translated at the average exchange rate of the reporting period.
- All resulting exchange differences are recognised as a separate component of equity.
- On the disposal of a foreign operation, the cumulative exchange differences relating to that particular foreign operation, presented as a separate component of equity, are recognised in the income statement as part of the gain or loss on sale.

On consolidation, exchange differences arising from the translation of the net investment in foreign operations, are recognised in shareholders' equity.

Goodwill and other fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and are translated at the closing rate at the balance sheet date.

2.5 Property plant and equipment

Buildings comprise mainly factories and offices. All property, plant and equipment are stated at historic cost less accumulated depreciation and any impairment losses, except for land which is shown at cost less any impairment losses.

Acquisition cost includes expenditure that is directly attributable to the acquisition of the tangible assets. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance costs are charged to the income statement during the financial period in which they are incurred.

Interest costs on borrowings, specifically, used to finance the acquisition of property, plant and equipment are capitalised, during the period of time required to prepare and complete the asset for its intended use. Other borrowing costs are recorded in the income statement as expenses.

Depreciation is calculated using the straight-line method to write off the cost of each asset to its residual value over its estimated useful life as follows:

Buildings up to 40 years
Vehicles 5 to 6 years
Glass Furnaces 5 years
Glass Moulds 2 years

Machinery 15 years (Pet Division)

Machinery up to 10 years (Other Divisions)

Furniture & Fixtures 3 to 6 years

The cost of subsequent expenditures is depreciated during the estimated useful life of the asset and costs for major periodic renovations are depreciated to the date of the next scheduled renovation. When an item of plant and machinery comprises major components with different useful lives, the components are accounted for as separate items of plant and machinery.

The tangible assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

In the case where an asset's carrying amount is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount and the difference (impairment loss) is recorded as expense in the income statement.

Gains and losses on disposals are determined by the difference between the sales proceeds and the carrying amount of the asset. These gains or losses are included in the income statement.

2.6 Intangible assets

2.6.1 Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the Group's share in the acquired subsidiary's net assets at the date of acquisition. Goodwill on acquisitions of associates is included in investments in associates.

Goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. At each balance sheet date the Group assesses whether there is any indication of impairment. If such indications exist, an analysis is performed to assess whether the carrying amount of goodwill is fully recoverable.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is performed on the cash-generating units that are expected to benefit from the acquisition from which goodwill was derived.

Loss from impairment is recognised if the carrying amount exceeds the recoverable amount. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

2.6.2 Research Expenses

Research expenditure is recognised as an expense as incurred.

2.6.3 Development Expenses

Costs incurred on development projects (relating to the design and testing of new or improved products) are recognised as intangible assets when it is probable that the project will be successful, considering its commercial and technological feasibility, and also the costs can be measured reliably. Other development expenditures are recognised as an expense in the income statement as incurred. Development costs that have a finite useful life and that have been capitalised, are amortised from the commencement of their production on a straight line basis over the period of its useful life, not exceeding 5 years.

2.6.4 Computer software

Capitalised software licenses are carried at acquisition cost less accumulated amortisation, less any accumulated impairment. They are amortised using the straight-line method over their useful lives, not exceeding a period of 5 years. Computer software development or maintenance costs are recognised as expenses in the income statement as they incur.

2.6.5 Other intangible assets

Patents, trademarks and licences are shown at historical cost less accumulated amortisation. These intangible assets have a definite useful life, and their cost is amortised using the straight-line method over their useful lives not exceeding a period of 5 years.

2.7 Impairment of assets

Assets that have an indefinite useful life are not subject to amortisation and are tested for impairment annually and whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognised as an expense immediately, for the amount by which the asset's carrying amount exceeds its recoverable amount.

The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units).

2.8 Financial assets

The Group classifies its financial assets in the following categories: at fair value through profit and loss, loans and receivables, and available for sale. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition and re-evaluates this designation at every reporting date.

(a) Financial assets at fair value through profit and loss

This category has two sub-categories: financial assets held for trading, and those designated at fair value through profit or loss at inception. A financial asset is classified in this category if acquired principally for the purpose of selling in the short term or if so designated by management.

The Group and the Company did not own any financial assets, including derivatives held for trading, that are recorded at fair value through the income statement for the periods presented in these financial statements.

(b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the balance sheet date, which are classified as non-current assets. Loans and receivables are classified as 'trade and other receivables' in the balance sheet (Note 2.11). The Group did not have any loan receivables during the periods presented in these financial statements.

(c) Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless management intends to dispose of the investment within 12 months of the balance sheet date.

The Group did not own any financial assets that can be characterised as available-for-sale financial assets during the periods presented in these financial statements.

Equity investments in subsidiaries are measured at cost less impairment losses in the separate financial statements of the parent. Impairment losses are recognised in the income statement.

2.9 Leases

2.9.1 When a Group company is the lessee

Leases where the lessor retains a significant portion of the risks and rewards of ownership are classified as operating leases. Payments made under operating leases (net of any incentives received by the lessor) are charged to the income statement on a straight-line basis over the period of the lease.

Leases of property, plant and equipment where a Group entity has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the inception of the lease at the lower of the fair value of the leased assets and the present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance lease liability outstanding. The corresponding rental obligations, net of finance charges, are included in liabilities as other long-term payables. The interest element of the finance cost is charged to the income statement over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. Property, plant and equipment, acquired under finance leases are depreciated over the shorter of the asset's useful life and the lease term.

2.9.2 When a Group company is the lessor

When assets are leased out under a finance lease, the present value of the lease payments is recognised as a receivable. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income. Lease income is recognised over the term of the lease using the net investment method, which reflects a constant periodic rate of return.

Assets leased out under operating leases are included within tangible assets in the balance sheet. They are depreciated over their expected useful lives, which are defined on the basis of similar tangible assets owned by the Group. Rental income (net of any incentives given to lessees) is recognised on a straight-line basis over the lease term.

2.10 Inventories

Inventories are recorded at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less any applicable selling expenses.

The cost of finished goods and work in progress comprises raw materials, direct labour cost and other related production overheads.

Appropriate allowance is made for excessive, obsolete and slow moving items. Write-downs to net realisable value and inventory losses are expensed in the period in which the write-downs or losses occur.

2.11 Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method less provision for impairment. A provision for impairment of trade receivables is established when there is objective evidence that the Group entity will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the asset's carrying amount and the recoverable amount.

The recoverable amount, if the receivable is more than 1 year is equal to the present value of expected cash flow, discounted at the market rate of interest for similar borrowers. The amount of the provision is recognised as an expense in the income statement.

2.12 Cash and cash equivalents

Cash and cash equivalents include cash on hand, deposits held at call with banks, other short-term, highly liquid investments with original maturities of three months or less. Bank overdrafts are included within borrowings in current liabilities on the balance sheet.

2.13 Share capital

- Ordinary shares are classified as equity.
- Incremental external costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.
- When the Company or its subsidiaries purchase the Company's own equity share
 the amount paid including any attributable incremental external costs net of
 income taxes is deducted from total shareholders' equity as treasury shares until
 they are cancelled or reissued. Where such shares are subsequently sold or
 reissued, any proceed received is included in shareholders' equity.

2.14 Borrowings

Borrowings are recognised initially at fair value, as the proceeds received, net of any transaction cost incurred. Borrowings are subsequently recorded at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings.

Borrowings are classified as current liabilities unless the Group entity has an unconditional right to defer settlement for at least 12 months after the balance sheet date.

2.15 Deferred income taxes

Deferred income tax is provided in full, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements.

The deferred income tax that arises from initial recognition of an asset or liability in a transaction other than a business combination, that at the time of the transaction affects neither accounting nor taxable profit nor loss, is not accounted for.

Deferred tax assets are recognised to the extent that future taxable profit, against which the temporary differences can be utilised, is probable.

Deferred tax liabilities are provided for taxable temporary differences arising on investments in subsidiaries, except for when the Group is able to control the reversal of the temporary difference, thus it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income taxation is determined using tax rates that have been enacted at the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the related deferred income tax liability is settled. Deferred tax is charged or credited in the income statement, unless it relates to items credited or charged directly to equity, in which case the deferred tax is also recorded in equity.

2.16 Employee benefits

2.16.1 Retirement Benefits

Group entities operate various pension and retirement schemes in accordance with the local conditions and practices in the countries they operate. These schemes include both funded and unfunded schemes. The funded schemes are funded through payments to insurance companies or trustee-administered funds, as determined by periodic actuarial calculations.

A defined benefit plan is a pension or voluntary redundancy plan that is not a defined contribution plan. Typically, defined benefit plans define an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation. A defined contribution plan is a pension plan under which the Group pays fixed contributions into a separate entity. The Group has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

The liability regarding defined benefit pension or voluntary redundancy plans, including certain unfunded termination indemnity benefits plans, is measured as the present value of the defined benefit obligation at the balance sheet date minus the fair value of plan assets (when the program is funded), together with adjustments for actuarial gains/losses and past service cost. The defined benefit obligation is calculated at periodic intervals not exceeding two years, by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by the estimated future cash outflows using interest rates applicable to high quality corporate bonds or government securities with terms to maturity approximating the terms of the related pension liability.

Actuarial gains and losses arising from experience adjustments, changes in actuarial assumptions and amendments to pension plans are charged or credited to equity during the assessment period by external actuaries.

Past service cost is recognised as expense on a constant basis during the average period until the contributions are vested. To the extent that these contributions have been vested directly after the amendments or the establishment of a defined benefit plan, the company directly records the past service cost.

As for defined contribution plans, the Group entity pays contributions into a separate fund to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. Once the contributions have been paid, the Group entity has no further payment obligations. The regular contributions are recorded as net periodic expenses for the year in which they are due, and as such are included in staff costs.

2.16.2 Termination benefits

Termination benefits are payable whenever an employee's employment is terminated before the normal retirement date or whenever an employee accepts voluntary redundancy in exchange for these benefits.

The Group recognises termination benefits when it is demonstrably committed either to terminate the employment of current employees according to a detailed formal plan without possibility of withdrawal, or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Benefits falling due more than 12 months after balance sheet date are discounted to present value.

2.16.3 Bonus plans

The Company and the Group recognizes a liability for bonuses that are expected to be settled within 12 months and based on amounts expected to be paid upon the settlement of the liability.

2.16.4 Share-based payments (Stock Appreciation Right-SARs Phantom Option Plan)

The Company operates a phantom share option scheme for its senior executives in the form of Stock Appreciation Rights depending on their performance, employment period in the company, and their positions' responsibilities. The terms of the SARs are based upon the basic terms and conditions of stock option plans except that instead of shares the holders receive a payment equal to the difference between the market price of the company's shares at the date of exercise and the exercise price. The options are subject to a two-year service vesting condition after granting and may be exercised during a period of three years from the date of award. At each balance sheet date, the fair value of the rights rendered is measured and is recognized as a liability in the balance sheet and as an expense in the income statement. Any subsequent changes in the fair value of the liability are recorded in the income statement for the period until the liability is settled.

2.17 Provisions

Provisions are recognised when a) a Group entity has a present legal or constructive obligation as a result of past events, b) it is probable that an outflow of resources will be required to settle the obligation, c) and of the amount can be reliably estimated. Restructuring provisions comprise lease termination penalties and employee termination payments and are recognised in the period during which the Group entity is legally or constructively bound to pay the respective amounts. Provisions are not recognised for future operating losses related to the Group's ongoing activities.

When there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

In the case that a Group entity expects a provision to be reimbursed from a third party, for example under an insurance contract, the reimbursement is recognised as a separate asset provided that the reimbursement is virtually certain.

The Group entity recognises a provision for onerous contracts when the expected benefits to be derived from a contract are less than the unavoidable costs of settling the obligations under the contract.

Provisions are measured at the present value of the expenditures that, according to the management's best estimations, are expected in order to settle the current obligation at the balance sheet date (note 4.1). The discounting rate used for the calculation of the present value reflects current market assessments of the time value of money and the risks specific to the obligation.

2.18 Revenue recognition

Revenue comprises the fair value for the sale of goods and services net of value-added tax, rebates and discounts, and after eliminating sales within the Group in the consolidated financial statements. Revenue is recognised as follows:

Sales of goods

Revenue from the sale of goods is recognised when the significant risks and rewards of owning the goods are transferred to the buyer, (usually upon delivery and customer acceptance) and the collectibility of the related receivable is reasonably assured.

Sales of services

Sales of services are recognised in the accounting period in which the services are rendered, by reference to completion of the specific transaction assessed on the basis of the actual service provided as a proportion of the total services to be provided.

Interest income

Interest income is recognised on a time-proportion basis using the effective interest method. When a receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loans is recognised using the original effective interest rate.

Dividend income

Dividend income is recognised when the right to receive payment is established.

2.19 Dividend distribution

Dividends are recorded in the financial statements, as a liability, in the period in which they are approved by the Annual Shareholder Meeting.

2.20 Government Grants

Grants from the government are recognized at their fair value where there is a reasonable assurance that the grant will be received and the Group entity will comply with anticipated conditions.

Government grants relating to costs are deferred and recognized in the income statement over the period corresponding to the costs they are intended to compensate.

Government grants relating to the purchase of property, plant and equipment are included in long-term liabilities as deferred income and are credited to the income statement on a straight-line basis over the expected lives of the related assets.

2.21 Assets Held for Sale

Assets classified as Assets Held for Sale are stated at the lower of carrying amount and fair value less costs to sell, if their carrying amount is to be recovered principally through a sale transaction rather than through continuing use.

The Group adopted IFRS 5 from January 1, 2005 prospectively in accordance with the standard's provisions. The assets held for sale were previously neither classified nor presented as current assets or liabilities. Such assets were not previously measured differently from other assets and liabilities.

2.22 New accounting standards and IFRIC interpretations

The following new standards, amendments to standards and interpretations are mandatory for financial year ending 31 December 2006.

- Amendment to IAS 19, 'Actuarial gains and losses, group plans and disclosures', effective for annual periods beginning on or after 1 January 2006. The Group decided to retain its former accounting policy regarding the recognition of actuarial gains and losses. The additional disclosing requirements will be presented in the financial statements for the year ended 31 December 2006.
- Amendment to IAS 39, Amendment 'Cash flow hedge accounting of forecast intragroup transactions', effective for annual periods beginning on or after 1 January 2006. This amendment is not relevant for the group;
- Amendment to IAS 39, Amendment to 'The fair value option', effective for annual periods beginning on or after 1 January 2006. This amendment does not have any impact on the classification and valuation of the Group's financial instruments classified as at fair

value through profit or loss prior to 1 January 2006 as the Group is able to comply with the amended criteria for the designation of financial instruments at fair value through profit and loss:

- Amendment to IAS 39 and IFRS 4, Amendment 'Financial guarantee contracts', effective for annual periods beginning on or after 1 January 2006. This amendment is not relevant for the Group;
- IFRS 1 and IFRS 6, 'Exploration for and evaluation of mineral resources', effective for annual periods beginning on or after 1 January 2006. This standard is not relevant for the Group;
- IFRS 7, 'Financial instruments: Disclosures', effective for annual periods beginning on or after 1 January 2007. IAS 1, 'Amendments to capital disclosures', effective for annual periods beginning on or after 1 January 2007. The Group assessed the impact of IFRS 7 and the amendment to IAS 1 and concluded that the main additional disclosures will be the sensitivity analysis to market risk and capital disclosures required by the amendment of IAS 1. The Group will apply IFRS 7 and the amendment to IAS 1 from annual periods beginning 1 January 2007.
- Amendment to IAS 21, Amendment 'Net investment in a foreign operation', effective for annual periods beginning on or after 1 January 2006. This amendment is not relevant for the Group;
- IFRIC 4, 'Determining whether an arrangement contains a lease', effective for annual periods beginning on or after 1 January 2006. The Group has reviewed its lease contracts and has concluded that the current accounting treatment is not impacted.
- IFRIC 5, 'Rights to interests arising from decommissioning, restoration and environmental rehabilitation funds', effective for annual periods beginning on or after 1 January 2006. This interpretation is not relevant for the Group; and
- IFRIC 7, 'Applying the Restatement Approach under IAS 29', effective for annual periods beginning on or after 1 March 2006. Management do not expect the interpretation to be relevant for the Group;
- *IFRIC 8, 'Scope of IFRS 2*', effective for annual periods beginning on or after 1 May 2006. IFRIC 8 is not likely to have impact on the Group's financial statements.
- IFRIC 9, 'Reassessment of Embedded Derivatives', effective for annual periods beginning on or after 1 June 2006. This interpretation will not have a significant impact on the Group's financial statements.

2.23 Reclasiffications of amounts

Amounts on the financial statements of the previous periods have been reclassified so as to be comparable with those of the current period. These reclassifications had no effect on Net Profit attributable to the shareholders of the Company, on Net Profit attributable to minorities, on EBITDA, and on assets, liabilities and equity (see Note 30).

3 Financial risk management

3.1 Financial risk factors

The Group's activities expose it to a variety of financial risks: market risk (price risk and currency risk), credit risk, liquidity risk and cash flow interest rate risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

Risk management is carried out by a central treasury department (Group Treasury) under policies approved by the Board of Directors. Group Treasury identifies, evaluates and hedges financial risks in close co-operation with the Group's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

The Group Treasury does not perform speculative transactions or transactions that are not related to the Group's operations.

The Company's and the Group's financial instruments consist mainly of deposits with banks, bank overdrafts, trade accounts receivable and payable, loans to and from subsidiaries, associates, joint ventures, equity investments, dividends payable and leases obligations

The Group's overall risk management program focuses on the natural hedging in order to minimize the unpredictability of financial markets and seeks to minimize potential adverse effects on the Group's financial performance.

The Group/Company does not use derivative financial instruments to hedge for risk exposures. The Group/Company does not participate in any financial instruments that could expose it foreign exchange and interest rates fluctuations.

a) Market Risk

i) Foreign exchange risk

The Group/Company operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the US dollar, Nigerian Naira, South African Rand, Indian Rupee, Norwegian Crone, Swedish Crone and the Russian rouble.

Entities in the Group use natural heading, transacted with the Group Treasury, to hedge their exposure to foreign currency risk in connection with the presentation currency.

The Group has certain investments in subsidiaries that operate in foreign countries, whose net positions are exposed to foreign exchange risk during the consolidation of their financial statements to the Group's financial statements. The Group is not substantially exposed to this type of risk since most of its subsidiaries use Euro as their functional currency with the exception of the subsidiaries in Nigeria and Poland.

ii) Price risk

The Group is not exposed to risks from changes in the prices of equity securities since it does not own securities that can be characterised either as available for sale assets or financial assets recorded at fair value in the financial statements.

The Group is exposed to changes in the prices of raw materials. This risk is offset by increased productivity, by increased sales volume resulting in fixed cost allocation over greater production volume, as well as by absorption of the change in cost into the final price of the product.

b) Credit risk

The Group/Company has policies in place to ensure that sales of products and services are made to customers with an appropriate credit history.

Trade accounts receivable consist mainly of a large, widespread customer base. All Group companies monitor the financial position of their debtors on an ongoing basis.

Where necessary, credit guarantee insurance cover is purchased. The granting of credit is controlled by credit limits and application of certain terms. Appropriate provision for impairment losses is made for specific credit risks. At the year-end management considered that there was no material credit risk exposure that had not already been covered by credit guarantee insurance or a doubtful debt provision. The Group and the Company do not use derivative financial products.

The Group and the Company have a significant concentration of credit risk exposures regarding cash and cash equivalent balance and revenues from the sale of products and merchandise. However, losses are not expected since sales are transacted with customers with good credit history and cash transactions are limited only to financial institutions with high quality credit credentials.

c) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and the availability of funding through an adequate amount of committed credit facilities and the ability to close out adverse market positions.

Due to the dynamic nature of the underlying businesses, Group treasury aims at maintaining flexibility in funding by maintaining committed (exclusive) credit lines.

The Group manages liquidity risk by proper management of working capital and cash flows. It monitors forecasted cash flows and ensures that adequate banking facilities and reserve borrowing facilities are maintained. The Group has sufficient undrawn call/demand borrowing facilities that could be utilised to fund any potential shortfall in cash resources.

d) Interest-rate risk

The Group's/Company's income and operating cash flows are substantially independent of changes in market interest rates since the Group does not hold any interest bearing assets other than short-term time deposits. Exposure to interest rate risk on liabilities is limited to cash flow risk from changes in floating rates.

The Group continuously reviews interest rate trends and the tenure of financing needs. Consequently, all short, medium and long term borrowings are entered into at floating rates with re-evaluation dates in less than 6 months.

3.2 Fair value estimation

The nominal value less impairment provision of trade receivables is assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments.

4. Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under current circumstances.

4.1 Critical accounting estimates and assumptions

The Group makes estimates and assumptions concerning the future. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year concern income tax.

Significant judgement is required by the Group Management in determining the worldwide provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain. If the final tax outcome is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax.

4.2 Critical judgements in applying the entity's accounting policies

There are no areas that Management required to make critical judgements in applying accounting policies.

Group

The compensation expense relating to SARs recorded was in € ths. for:

30/09/2006	31/12/2005
860	774

The company operates a phantom share option scheme for its senior executives in the form of Stock Appreciation Rights depending on their performance, employment period in the company, and their positions' responsibilities. The terms of the SARs are based upon the basic terms and conditions of stock option plans except that instead of shares the holders receive a payment equal to the difference between the market price of the company's shares at the date of exercise and the exercise price. The options are subject to a two year vesting condition after granting and may be exercised during a period of three years after vesting.

Share capital

The share capital of the company comprises of 40.000.000 fully paid up shares of €1.0 each.

The share premium accounts represents the difference between the issue of shares (in cash) and their par value cost.

At the Annual General Meeting of the shareholders on 9 June 2006 the increase of the Company's share capital through the capitalisation of a portion of the special reserve account "shares premium", by the amount of EUR 50,4 m was approved as well as the decrease of the Company's share capital by an equal amount so as to offset losses resulting from the first application of IFRS (Change of basis of accounting).

A statutory reserve is created under the provisions of Hellenic law (Law 2190/20, articles 44 and 45) according to which, an amount of at least 5% of the profit (after tax) for the year must be transferred to this reserve until it reaches one third of the paid share capital. The statutory reserve can not be distributed to the shareholders of the Company except for the case of liquidation.

The Company has created tax free reserves, taking advances off various Hellenic Taxation laws, during the years, in order to achieve tax deductions, either by postponing the tax liability till the reserves are distributed to the shareholders, or by eliminating any future income tax payment by issuing new shares for the shareholders of the company. Should the reserves be distributed to the shareholders as dividends, the distributed profits will be taxed with the rate that was in effect at the time of the creation of the reserves. No provision has been created in regard to the possible income tax liability in the case of such a future distribution of the reserves the shareholders of the company as such liabilities are recognized simultaneously with the dividends distribution.

Group

The tax rates in the countries where the Group operates are between 10% and 40%.

Some of non deductible expenses and the different tax rates in the countries that the Group operates, create a tax rate for the Group approximately of **29,9%** (Greek Taxation Rate is 29%)

The main reasons that the 2005 effective tax rate of 33,8% reduced to 29,9% for 2006 are disclosed below:

- a) There is a significant reduction of non profitable companies
- b) The tax rates, in the countries where the Group operates, have been reduced.

The tax returns for the Parent Company and for the Group subsidiaries have not been assessed by tax authorities for different periods. Until the tax audit assessment for the companies described in the table above is completed, the tax liability can not be finalized for those years.

Receivables from management & BoD members				
Payables to management & BoD members				

Note 25 - Earnings per share

Basic & Diluted earnings per share from continuing and discontinuing operations

Basic and Diluted earnings per share are calculated by dividing the profit attributable to equity holders of Parent Company, by the weighted average number of ordinary shares in issue during the year, excluding ordinary shares purchased by the company (treasury shares)

Continuing Operations

Group

amounts in 000's Euro (except per share)	30/09/2006	30/09/2005
Profit attributable to equity holders of the company	37.507	23.104
Weighted average number of ordinary shares	40.000	40.000
Basic and diluted earnings per share from continuing operations	0,94	0,58

Discontinuing Operations

Group

amounts in 000's Euro (except per share)	30/09/2006	30/09/2005
Profit attributable to equity holders of the company	Not Applicable	649
Weighted average number of ordinary shares	40.000	40.000
Basic and diluted earnings per share from discontinuing operations	Not Applicable	0,02

Note 26 -Contingent Liabilities

The Parent company has contingent liabilities in respect of bank guarantees arising from the ordinary course of business as follows:

IN € 000'S	
30/09/2006	31/12/2005
109.083	124.237

The Group did not have any contingent liabilities as at 30/09/2006 and 31/12/2005.

There are no pending litigation, legal proceedings, or claims which are likely to affect the financial statements or the operations of the Group and the parent company.

The tax returns for the Parent Company and for the Group subsidiaries have not been assessed by the tax authorities for different periods. (see Note 20)

The management of the Group believes that no significant additional taxes besides of those recognised in the financial statements will be finally assessed.

in € 000's

Note 27 -

Assets held for sale

On December 15, 2005 Frigoglass announced the sale of its stockholding in VPI SA. Frigoglass is a stockholder of 51% of VPI SA based at the city of Volos. The final agreement was signed on 28/2/2006.

The Parent company's investment in VPI SA amount to €12.998 ths.

The purchase price for the shares amounts to €15.000 ths., €12.000 ths will be paid upon completion of the transaction under the condition that the net asset position of VPI will be at least €30.000 ths., while the balance will be paid in three equal annual instalments till January 2009, and is linked to the condition that VPI's sales will remain at their present level.

The completion of VPI sale is subject to the approval of the Greek Minister of Economy and Finance, given that VPI S.A has received government grants under law 1892/1990, The shares in VPI S.A will be transferred as soon as the above approval is granted. The sale of VPI shares is consistent with the Frigoglass Group strategy to focus on its core business on ICM. (VPI paid dividends on 2004 and on 2005 of €1.011 ths. to Frigoglass SAIC).

Balance sheet and income statement of VPI SA are shown below:

As shown above the Group's operations exhibit seasonality, therefore interim period sales should not be used for forecasting annual sales.

Amounts in the financial statements of the previous periods have been reclassified so as to be comparable with those of the current period. The reclassifications have no effect on the Net Profit attributable to Companh shareholders, on the Net Profit attributable to the Minorities, on the EBITDA, on the Assets and Liabilities of the Company. The reclassification was made in order for the expenses to be depicted according to the function they relate to with the scope of a proper presentation to the shareholders.
