

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law regarding the key information documents related to this product to help you understand the nature, risks, costs potential gains and losses of this product and to help you compare it with other products.

Product

Product Name: ALPHA ETF FTSE Athex Large Cap EQUITY UCITS (hereafter “the Fund”)
ISIN: GRF000153004
PRIPs Manufacturer: Alpha Asset Management M.F.M.C, (hereafter “the Company”) a member of Alpha Bank Group
Supervising Authority: Hellenic Capital Market Commission

The Hellenic Capital Market Commission is responsible for the supervision of the Company in relation to this Key Information Document. The Fund is authorised in Greece. The Company is licensed in Greece and is subject to supervision by the Hellenic Capital Market Commission.

For any information, clarification or comment about the product you can call at +30 210 3266505 or visit website www.alphamutual.gr. The information provided in this document is accurate as of 31/01/2025.

What is this product?

Type

The Fund is a form of Collective investment in transferable securities (“UCITS ETF”), as defined by the provisions of Law 4099/2012 and the Directive 2009/65/EC as applicable. The Fund has no legal form, constitutes a group of assets that is composed of securities, money market instruments and cash, the individual elements of which belong to more than one unitholder, based on the number of units they own, is managed by the Company which represents the unitholders both judicially and extrajudicially, for legal relationships arising from the management and their rights over its assets.

Term

The Fund has an indefinite duration and is terminated in case any of the conditions referred to in article 9 par. 1 of Law 4099/2012 are met and in accordance with article 11 of the Fund’s Regulation.

Objectives

The Fund aims to track the performance, either positive or negative, of the FTSE®/Athex Large Cap Index by mirror matching the composition of the index. The goal is to minimize tracking error against the Index. The expected tracking error, under normal market conditions, is 1.74%, and it is based on the realized tracking error of the past year. The Fund invests at least 95% of its assets in equities included in the Index and in derivative instruments with underlying asset: (a) the Index, (b) equities included in the Index, (c) other indices with high correlation with the Index. Given the full physical replication of the Index, the increased frequency of rebalancing causes an increase in costs primarily driven by the associated transaction costs and the marketability and availability of the securities that comprise the Fund. The Fund is not allowed to invest in derivative financial instruments for the purpose of covering or reducing (hedging) the risk of the components that make up the Index. In addition, the Fund may use techniques and instruments related to securities, money market instruments and derivative financial instruments for the purpose of effectively managing and/or hedging components of its net assets.

Benchmark: FTSE®/Athex Large Cap Index. It consists of the 25 largest, in terms of market capitalization, companies listed on the Athens Exchange. FTSE®/Athex Large Cap Index is a price return index, i.e. its performance considers only the price movements of the constituents that make up the index and does not include dividends or other income paid by its constituents. Further information with regard to the Benchmark and its composition, interested parties can refer to the website: <https://www.athexgroup.gr/el/index-composition/-/select-index/62>.

Income generated by the Fund may be reinvested.

The reference currency of the Fund is EUR.

The dividends received annually from companies to which the Fund invests are distributed at the last day of the financial year, end of June, in the form of units of the Fund.

The Fund is admitted to trading in the Athens Exchange. The sale and purchase of shares through the secondary market is subject to the regulations governing the market in which the Fund is traded. Investors wishing to purchase/sell shares through the secondary market should contact their investment advisor / Investment Services Firm.

The “ALPHA ETF FTSE Athex Large Cap EQUITY UCITS” is exposed to market risk arising from fluctuations in the portfolio’s market value, attributed to market movements. The Fund is exposed to liquidity risk, the risk that certain assets of the Fund cannot be liquidated at the desired time or at a limited cost, in order for the Fund to comply at all times with its redemption obligations. In more detail, the risks associated with the Fund are presented in the next section “What are the risks and what could I get in return?”

Intended retail investor

To investors with a long-term investment horizon, six years minimum (recommended holding period) and an aggressive investment profile who wish a diversified exposure to the Greek equity market, in a flexible manner and at a low cost.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. On a risk scale 1 to 7, we have classified the Fund at 5 which is a “medium-high” risk class. This classification rates at a “medium-high” level the potential losses from future performance of the Fund and poor market conditions are very unlikely to have an impact on the capacity of the Fund, legally represented, to pay you through its Depositary. Other relevant risks of the Fund not included in the summary risk indicator are concentration risk, the risk arising from a high degree of concentration in one or more issuers, liquidity risk, the risk that certain assets of the Fund cannot be liquidated at the desired time or at a limited cost, in order for the Fund to comply at all times with its redemption obligations and operational risk, the risk of loss for the Fund that may arise from human errors or omissions, process errors, system failures or external events, including risks related to the custody of the Fund’s assets. The Fund does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, the average, and the best performance of the Fund over the last 11 years. Markets could develop very differently in the future.

Recommended holding period:	6 years	If you exit after 1 year	If you exit after 6 years
Example Investment:	10.000 EUR		
Scenarios			
Minimum	You could lose some or all of your investment		
	What you might get back after costs	650 €	1.270 €
Stress	Average return of each year	-93,5%	-29,1%
	What you might get back after costs	8.420 €	3.630 €
Unfavourable	Average return of each year	-15,8%	-15,6%
	What you might get back after costs	10.590 €	14.360 €
Moderate	Average return of each year	5,9%	6,2%
	What you might get back after costs	11.390 €	22.210 €
Favourable	Average return of each year	13,9%	14,2%

The figures shown include all the costs of the Fund itself as well as the distribution costs you may pay to your distributor. It may not include your advisor’s costs. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. The unfavourable scenario occurred for an investment between March 2014 and April 2020. The moderate scenario occurred for an investment between September 2017 and October 2023 and the favourable scenario between November 2018 and December 2024.

What happens if the Company is unable to pay out?

The Depositary ensures that the Fund’s assets are kept separate from their own assets as well as those of its other clients without being affected in the event of default of the Company’s payments. There is no compensation or guarantee system for investors.

What are the costs?

The person advising on or selling you this product in the context of providing investment services, may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, the holding period and the Fund’s performance. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the Fund performs as shown in the moderate scenario
- 10.000 EUR is invested.

	If you exit after 1 year	If you exit after 6 years
Total costs	129 €	843 €
Annual cost impact (*)	1,3%	1,1% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 7,3% before costs and 6,2% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	0,10 % of the amount you pay in when entering this investment	10 EUR
Exit costs	0,20 % of your investment before it is paid out to you An escalating, up to zero, exit cost applies. More information is available in the Fund's Prospectus.	20 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0,92 % of the value of your investment per year This is an estimate based on actual costs over the last year	91 EUR
Transaction costs	0,08 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell	8 EUR
Incidental costs taken under specific conditions		
Performance fees	They are not applicable	0 EUR

How long should I hold it and can I take money out early?

Recommended holding period: 6 years

The Fund has no minimum required holding period. Although there is not a minimum required holding period, it is recommended for investors to maintain their investment for 6 years (recommended holding period or RHP). This RHP is chosen based on an assessment of the asset mix risk, reward profile and costs of the Fund. You have the option to redeem part or all of your investment, any business day with the respective redemption fee (if any). The redemption of Fund's units is mandatory when requested by the unitholder in accordance with the specific provisions set out in article 7 of the Fund's Regulation.

How can I complain?

In case you wish to file complaints with respect to the Fund or the Company's or the person that offers advice with respect to the Fund or the person selling you units of the Fund, you may address to the Company or Alpha Bank branches, either electronically at <https://www.alphamutual.gr/en/contact-us> and email at info@alphaasset.gr, or call at +30 210 3266505 (Alpha Asset Management M.F.M.C.), or send a fax at +30 210 326 6506, or via post using the address Panepistimiou 45, 105 64 Athens (Company head office) and all Alpha Bank branches (main distributor).
